LABEL
Du Pont Lannate® insecticide is recommended for control of cotton fleahopper on cotton in the Southwest. The low use rates help conserve beneficial predators.

**HOW TO USE**

Apply 1/8 to 1/4 lb. of Lannate® per acre in sufficient water (minimum 2 gals. per acre by air) to obtain thorough coverage. Initiate schedule of sprays when significant numbers of fleahoppers are present. Continue at 5- to 7-day intervals.

Scouting of fields is required to insure proper timing of spray.

Note: Lannate® may be applied up to 15 days before harvest. Do not graze or feed treated cotton to livestock. Use of Lannate® may redden cotton foliage. If reddening is excessive, alternate with other insecticides or discontinue use.

**IMPORTANT**

BEFORE USING LANNATE®, READ AND CAREFULLY OBSERVE THE CAUTIONARY STATEMENTS AND ALL OTHER INFORMATION APPEARING ON THE PRODUCT LABEL.

This bulletin contains new or supplemental instructions for use of this product which may not appear on package label. Follow the instructions carefully.

ANNATE® INSECTICIDE
FOR USE ON PEANUTS

Du Pont "Lannate" Insecticide is recommended for use on peanuts for control of granulate cutworm.

HOW TO USE

Apply 1/2 to 1 lb. "Lannate" per acre as a spray in sufficient water to obtain thorough coverage (use a minimum of 2 gals. per acre for aerial application).

For best results, treatment should be applied when cutworms are in the foliage of the crop; this occurs at night or on cloudy days.

Use up to three applications as needed to maintain control.

Note: Do not apply within 21 days of harvest.
Do not feed treated vines to livestock.

IMPORTANT

BEFORE USING "ANNATE", READ AND CAREFULLY OBSERVE THE CAUTIONARY STATEMENTS AND ALL OTHER INFORMATION APPEARING ON THE PRODUCT LABEL.

This bulletin contains new or supplemental instructions for use of this product which may not appear on package label. Follow the instructions carefully.
