FOR ECONOMIC POISON REGISTERED
UNDER NO. 352-344

DIRECTIONS

"Tersan" SP should be used only in accordance with recommendations on this label, or in separate published Du Pont recommendations available through local dealers.

TURF DISEASES

Snow Mold—For the control of snow mold (Typhula), apply 6 to 9 oz. of "Tersan" SP per 1000 sq. ft. in sufficient water to give complete coverage, usually 3 to 5 gallons. Apply as a spray as late in the fall as possible prior to snowfall.

Pythium Blight—For control of Pythium blight on established turf, apply "Tersan" SP as a preventative at a rate of 4 oz. per 1000 sq. ft. in 3 to 5 gallons of water. Apply during periods of high temperature and humidity favorable to the development of disease. Repeat in 5 to 7 days if conditions persist.

For the control of Pythium blight on new seedings, apply "Tersan" SP at the rate of 4 oz. per 1000 sq. ft. following emergence. If conditions remain favorable to the development of disease, repeat in 7 to 10 days.

NOTICE TO BUYER— Seller warrants that this product conforms to the chemical description on the label thereof and is reasonably fit for purposes stated on such label only when used in accordance with directions under normal use conditions. This warranty does not extend to use of this product contrary to label use directions, or under abnormal use conditions, or under conditions not reasonably foreseeable to seller; buyer assumes all risk of any such use. Seller makes no other warranties, express or implied.
