HYVAR X-L BROMACIL WEED KILLER
FOR UNDILUTED USE
AS A BASAL (SPOT) TREATMENT OF BRUSH

Du Pont "Hyvar" X-L Bromacil Weed Killer is recommended for use undiluted as a basal (spot) treatment in non-cropland areas to control brush such as American elm, sumac, cottonwood, maple, oak, poplar, sweet gum, wild cherry, and willow.

HOW TO USE

Apply "Hyvar" X-L undiluted with an exact delivery handgun applicator at the rates of 5 to 10 milliliters per stem 2" to 4" in basal diameter. Direct the treatment to a spot at the base of the brush (root collar area). When treating large stems and more than one delivery of solution is needed per stem, apply on the opposite side of the stem.

Note: "Hyvar" X-L is a combustible product. While applying the undiluted product, do not smoke, and keep away from heat and open flame.

An exact delivery handgun applicator delivers a thin stream of a predetermined volume when triggered.

IMPORTANT

BEFORE USING "HYVAR" X-L, READ AND CAREFULLY OBSERVE THE CAUTIONARY STATEMENTS AND ALL OTHER INFORMATION APPEARING ON THE PRODUCT LABEL.

This bulletin contains new or supplemental instructions for use of this product which may not appear on package label. Follow the instructions carefully.
