SUPPLEMENTAL LABELING
(EPA REG. NO. 352-346)

HYVAR® X-L WEED KILLER
FOR WEED CONTROL UNDER ASPHALT, CONCRETE,
AND POND LINERS

Du Pont Hyvar® X-L Weed Killer is recommended for weed control under asphalt, concrete, and pond liners to extend the useful life of the surfacing material by preventing weeds from emerging through it.

HOW TO USE

Remove vegetation and debris from the subgrade. Uniformly apply Hyvar® X-L to the area to be surfaced, including the shoulder areas, at the following rates:

- 3 to 5 gallons per acre for control of annuals such as cheat, crabgrass, downy brome, foxtail, lambsquarters, puncturevine, ragweed, ryegrass, turkey mullein, and wild oats;
- 5 to 7 1/2 gallons per acre for control of perennials such as bahiagrass, broomsedge, dandelion, dogfennel, goldenrod, plantain, purpletop, quackgrass, redtop, smooth brome, and wild carrot;
- 12 1/2 to 15 gallons per acre for control of bermudagrass, bouncingbet, bracken fern, dallisgrass, dogbane, horsetail, johnsongrass, nutsedge, saltgrass, and vaseygrass.

Following treatment, surfacing should be delayed until there has been at least 2 inches of rainfall followed by a 30-day period to allow Hyvar® X-L to be activated in the soil. If immediate surfacing is desired, Hyvar® X-L should be thoroughly incorporated into the soil to a depth of 4 to 6 inches using a rototiller or disc. Failure to activate Hyvar® X-L either through adequate rainfall or uniform soil incorporation will result in inadequate weed control.

Note: Injury to or loss of desirable trees or other plants may result from failure to observe the following: Do not apply on or near desirable trees or other plants, or on areas where their roots may extend. Do not plant ornamentals in or near treated areas.

Where hard-to-control perennials such as peppervine, trumpet creeper, field bindweed, and Smilax spp. (greenbrier) are in the treated area, another recommended herbicide such as [redacted] should also be applied.

Do not use in California.

BEST AVAILABLE COPY

IMPORTANT

Before using HYVAR® X-L, read and carefully observe the cautionary statements and all other information appearing on the product label.

This bulletin contains new or supplemental instructions for use of this product which may not appear on the package label. Follow the instructions carefully.

This labeling must be in the possession of the user at the time of pesticide application.
