### **DIRECTIONS**

Du Pont "Lannate" 4 G Methomyl Insecticide Granular should be used only in accord ance with recommendations on this label, or in separate published Du Pont recommendations available through local dealers.

Du Pont "Lannate" 4-G Methomyl Insecticide Granular is designed for control of the south western corn borer in sorghum in the State of Arizona. The granules may be applied in ground or aerial equipment to commercial plantings only. Do not use in home plantings

## Application

Make a broadcast application at the rate of 10 to 25 lhs, per acre when approximately 25% of the whorls are infested with worms but before the worms bore into the stalk of the sor ghum. A second treatment may be applied if needed but the total amount applied should not exceed 25 lbs per acre. Do not apply after sorghum has reached the boot stage. Do not feed, forage or ensile immature sorghum
