LANNATE® L METHOMYL INSECTICIDE
FOR USE ON SWEET CORN

Du Pont "Lannate" L Methomyl Insecticide is recommended for application by ground or aerial equipment to sweet corn for control of fall armyworm and European corn borer.

HOW TO USE

Apply 1 to 2 pts. "Lannate" L per acre for late season treatment. Begin applications when silks first appear and repeat at 1- to 3-day intervals or as needed until silks are dry or brown. Apply the low rates on light infestations of insects. Use sufficient water to obtain thorough coverage. For aerial application, use 5 to 15 gals. of water per acre.

Do not graze or feed treated plants to livestock within 3 days after last application.

Note: Pilot should not assist in the mixing and loading operations.

IMPORTANT

BEFORE USING "LANNATE" L, READ AND CAREFULLY OBSERVE THE CAUTIONARY STATEMENTS AND ALL OTHER INFORMATION APPEARING ON THE PRODUCT LABEL.

This bulletin contains new or supplemental instructions for use of this product which may not appear on package label. Follow the instructions carefully.
