APPROVED
 Federal Insecticide, Fungicide, and Rodenticide Act
 10/25/81
 353-201

Keep out of reach of children.

Precautionary Statements Hazards to Humans and Domestic Animals

CAUTION! Avoid contact with skin, eyes, and clothing. In case of contact, flush skin or eyes with plenty of water. For eyes, get medical attention if irritation persists.

Environmental Hazards

Keep out of any body of water. Do not apply where runoff is likely to occur. Do not contaminate water by cleaning of equipment or disposal of wastes.

IMPORTANT—Injury to or loss of desirable trees or other plants may result from failure to observe the following. Do not apply or empty equipment near desirable tree or other plants or on areas where their roots may extend, or in locations where the chemical may be washed or moved into contact with their roots. Do not use on lawns, walks, driveways, tennis courts, or similar areas. Prevent contact with desirable plants. Keep from contact with fertilizers, insecticides, fungicides, and seeds. Thoroughly clean all traces of Velpar® Gridball® Brush Killer from application equipment immediately after use. Wash equipment thoroughly with water.

Apply to soil surface and brush. Do not apply to desirable plants. Do not apply to lawns, walks, driveways, tennis courts, or similar areas. Do not apply to lawns, walks, driveways, tennis courts, or similar areas.

GENERAL INFORMATION

Du Pont Velpar Gridball Brush-Kuler is a special pelletized product to be distributed in a random grid pattern on the soil surface or applied by hand to individual plant stems in non-cropland areas for control of undesirable woody plants. In this application, the pellets and moves the herbicide into the root zone of the woody plants where it is absorbed during periods of active plant growth.

Symptoms of herbicidal activity generally appear within 3 to 4 weeks after sufficient rainfall has carried the herbicide into the root zone. Detachment and subsequent refoliation may occur, but susceptible plants are killed.

Velpar Gridball controls many woody plants including American elder, balsam poplar, birch, black cherry, blackgum**, black hickory**, boxelder**, brambles (such as blackberry, dewberry, and raspberry), cherry*, chokecherry, cottonwood**, dogwood*, eastern redcedar, elm, green ash, hawthorn, hickory*, hornbeam, mulberry, multiflora rose, Norway maple**, oak (such as black, blackjack, bluejack, post, southern red, turkey, water, and white oak), red maple, Russian olive, sumac, sweetgum, white ash, wild plum, and willow. Recommended rates also provide partial kill or suppression of sourwood.

The degree of control and duration of effect will vary with the amount of product applied, soil type, rainfall, timing of application and other conditions.

* Susceptible
** Resistant to herbicide

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

Pesticide Disposal Product or rinse water that cannot be used according to label instructions must be disposed of according to applicable Federal, State, and local procedures.

Container Disposal Do not reuse container or contents. Empty in a sanitary landfill or by incineration if permitted by State and local authorities.

NOTICE TO BUYER

Purchase of this material does not confer any rights under patents of countries outside of the United States.
