

◀ Continued from side panel

Use the higher levels of the recommended dosage ranges under the following conditions: on hard-to-kill species, on fine textured soils (clay, clay loam); on soils containing more than 5% organic matter or carbon, and, on coarse-textured soils (sand, loamy sand, gravelly soils) where rainfall exceeds 40 inches per year. Use the lower levels of the dosage range if the growing season is short.

Apply 9 to 18 lbs of 'Velpar' Dry Flowable per acre for season-long control of many annual, biennial and perennial weeds including bahiagrass*, bermuda grass*, bluegrass, broomsedge, camphorweed, Canada thistle*, chickweed, clovers, dewberry, dog fennel*, fescue*, fingergrass, foxtail, ghinea grass, heath aster, honeysuckle, lantana, marechal*, natalgrass, plantain, prickly lettuce, ragweed, smutgrass, Spanish needle, vaseygrass, wild blackberry*, and wild carrot.

For short term control (up to 3 months) of the above weeds, apply 3 to 7½ lbs per acre. Application at 3 to 7½ lbs per acre also provides short-term control of many annual, biennial and perennial weeds including barnyardgrass, bindweed*, bouncing bet*, bromegrass, buffelgrass*, burdock, cocklebur, crabgrass, crown vetch, curly dock*, dandelion*, dogbane*, fiddleneck, filaree, fleabane, goats-beard vine, goldenrod, Kochia, lespedeza, milkweed*, mustard, nutsedge*, orchardgrass*, oxalis, paragrass, pigweed, purslane, quackgrass, ryegrass, smartweed, spurge, trumpet creeper*, wild oats, wild parsnip and wild star thistle.

Precautionary Statements

Hazards to Humans and Domestic Animals

DANGER! Corrosive, causes eye damage. Do not get in eyes. Wear goggles or face shield and rubber gloves when handling. Avoid contact with skin and clothing. Avoid breathing dust or spray mist. Harmful if swallowed.

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Get medical attention if skin irritation persists. Remove and wash contaminated clothing before re-use.

Environmental Hazards

Keep out of any body of water. Do not use in areas where runoff is likely to occur. Do not contaminate water by cleaning of equipment or disposal of wastes.

IMPORTANT — Injury to or loss of desirable trees or other plants may result from failure to observe the following. Do not apply or drain or flush equipment on or near desirable trees or other plants, or on areas where their roots may extend, or in locations where the chemical may be washed or moved into contact with their roots. Do not use on lawns, walks, driveways, tennis courts, or similar areas. Prevent drift of dry product or spray to desirable plants. Keep from contact with fertilizers, insecticides, fungicides, and seeds.

Thoroughly clean all traces of "Velpar" Dry Flowable from application equipment immediately after use. Flush tank, pump, hoses and boom with several changes of water after removing nozzle tips and screens (clean these parts separately).

NOTICE OF WARRANTY

Du Pont warrants that this product conforms to the chemical description on the label thereof and is reasonably fit for purposes stated on such label only when used in accordance with the directions under normal use conditions. It is impossible to eliminate all risks inherently associated with the use of this product. Ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of Du Pont. In no case shall Du Pont be liable for consequential, special or indirect damages resulting from the use or handling of this product. All such risks shall be assumed by the Buyer. **DU PONT MAKES NO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE NOR ANY OTHER EXPRESS OR IMPLIED WARRANTY EXCEPT AS STATED ABOVE.**

GENERAL INFORMATION

Du Pont "Velpar" Dry Flowable Weed Killer is a granular formulation to be mixed in water and applied as a spray on noncropland areas. The granule rapidly disintegrates in water forming a suspension with proper agitation. It is non-volatile, non-flammable and non-corrosive to equipment.

"Velpar" Dry Flowable is an effective general herbicide providing both contact and residual control of many annual and biennial weeds, woody vines, and, except for johnsongrass, is effective for control of most perennial weeds. It is absorbed through the roots and foliage.

Moisture is required to activate "Velpar" Dry Flowable in the soil. Best results are obtained when weeds are young and actively growing, soil is moist at time of application, and 1/4 to 1/2 inch of rainfall occurs within 2 weeks after application. Foliar application to weeds is most effective under conditions of high temperature (above 80° F), high humidity and good soil moisture. Application when vegetation is dormant or semi-dormant may not be effective.

Symptoms usually occur within 2 weeks after application under warm humid conditions, while 4 to 6 weeks may be required when weather is cool. The degree of control and duration of effect will vary with the amount of chemical applied, rainfall, temperature, weed species, soil texture and other conditions.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Apply "Velpar" Dry Flowable as a spray just before or soon after weed emergence. Before spraying, calibrate equipment to determine the quantity of water necessary to uniformly and thoroughly cover the vegetation and soil in a measured area to be treated. Use at least 20 gals. per acre.

Add the proper amount of "Velpar" Dry Flowable into a spray tank filled with water using sufficient agitation to prevent the product from settling. Continuous agitation is needed to keep the product in suspension. Use a fixed-boom sprayer properly calibrated to a constant speed and rate of delivery. Sprayer screens should be no finer than 50 mesh. For application with a handgun sprayer, use sufficient water (50 to 200 gals. per acre) for thorough coverage. For treating small areas, a tank-type hand sprayer or sprinkling can may be used. A surfactant such as Du Pont Surfactant WK may be added at the rate of 1 quart per 100 gals. of spray to improve wetting and/or contact activity.

GENERAL WEED CONTROL — NON-CROPLAND AREAS

Railroad, Highway, Utility and Pipeline Right-of-Ways, Petroleum Tank Farms, Storage Areas, Industrial Plant Sites, Drainage Ditches and other similar areas.
