VYDATE® L INSECTICIDE/NEMATOCIDE
FOR USE ON EGGPLANT

DIRECTIONS FOR USE

Du Pont Vydate® L is recommended for control of aphids, Colorado potato beetle, leafminers, mites, and nematodes.

HOW TO USE

NEMATODES: Apply 4 qts. "Vydate" L per acre as a band treatment 2 to 3 weeks after transplanting and again 4 weeks later. Two to four weeks following the soil treatments, apply two foliar applications by ground of 2 qts. per acre at 1 to 2 week intervals.

INSECTS AND MITES: Apply 1 to 2 qts. "Vydate" L per acre by ground as a foliar spray when insects first appear and repeat at 1 to 3 week intervals as needed.

NOTE

Do not apply within 1 day of harvest when using only foliar applications. Do not apply within 7 days of harvest when using soil with foliar applications. Do not rotate to crops other than apples, cantaloupe, celery, citrus, cotton, cucumber, honeydew, ornamentals, pears, peppers, root crop vegetables, soybeans, summer squash, tobacco, tomatoes, watermelon, and winter squash within 4 months after the last application.

IMPORTANT

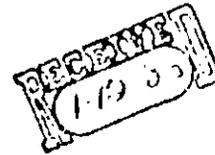

BEFORE USING "VYDATE" L, READ AND CAREFULLY OBSERVE THE CAUTIONARY STATEMENTS AND ALL OTHER INFORMATION APPEARING ON THE PRODUCT LABEL.

This bulletin contains new or supplemental instructions for use of this product which may not appear on package label. Follow the instructions carefully.
