E. I. du Pont de Nemours & Co. Inc.
P.O. Box 80039
Wilmington, DE 19880-0038

Dear Dr. Lin:

Subject: Du Pont Velpar® L Herbicide
EPA Registration No. 352-392
Application Dated August 31, 1992 and Resubmission Dated
February 2, 1993, Request to Add Use Directions for
Application with wiper/roller Equipment in Florida

The proposed amendment to register use directions for application with wiper/roller equipment for weed control in rights-of-way turf in Florida is acceptable under section 3 of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) as amended provided that you:

- o Submit five (5) printed copies of the final printed label before releasing the product for shipment.

If this condition is not complied with, the registration will be subject to cancellation in accordance with FIFRA, Section 6(a). Your release for shipment of the product constitutes acceptance of this condition.

A stamped copy of the labeling is enclosed for your records.

Sincerely yours,

Joanne I. Miller
Product Manager (23)
Fungicide-Herbicide Branch
Registration Division (R-7505C)

**VELPAR® L HERBICIDE
WIPER/ROLLER APPLICATION ON
RIGHTS-OF-WAY IN FLORIDA**

VELPAR® L HERBICIDE

EPA REG. NO. 352-392

FOR CONTROL OF WEEDS IN RIGHTS-OF-WAY USING WIPER/ROLLER APPLICATION EQUIPMENT

DIRECTIONS

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Du Pont "Velpar" L Herbicide is recommended for postemergence control of smutgrass when applied with carpet wiper/roller equipment in established stands of turf in Florida.

HOW TO USE

Apply "Velpar" L to emerged smutgrass foliage with roller/wiper equipment as follows:

For one pass of equipment, mix at a ratio of 2 1/2 pts "Velpar" L in 2 1/2 pts clean water and calibrate to apply 5 pts of mix per acre.

When the smutgrass infestation is severe or when smutgrass is mature a second pass in the opposite direction with the equipment will improve results. Apply as a mix at a ratio of 1 pt "Velpar" L in 4 pts of clean water.

Agitate mixture before use. Do not use a surfactant; however, a defoamer may be used, if necessary.

Operate the applicator at speeds of 10 MPH or less. The use of rope or wick type applicators is not recommended. Only use equipment which is equipped with a regulation device (i.e., needle valve) between the reservoir and the roller or wiper for calibration. The applicator should be operated to avoid drip from the roller/wiper.

IMPORTANT

BEFORE USING "VELPAR" L, READ AND CAREFULLY OBSERVE THE CAUTIONARY STATEMENTS AND ALL OTHER INFORMATION APPEARING ON THE PRODUCT LABEL.

This bulletin contains new or supplemental instructions for use of this product which may not appear on package label. Follow these instructions carefully.

This labeling must be in the possession of the user at the time of pesticide application.
