EPA REG. NO. 352-394

LOROX® DF™ HERBICIDE

FOR WEED CONTROL IN HYBRID POPLAR PLANTINGS
IN THE STATES OF MICHIGAN, MINNESOTA, NORTH AND SOUTH DAKOTA, AND WISCONSIN

DIRECTIONS FOR USE

It is a violation of federal law to use this product
in a manner inconsistent with its labeling.

Du Pont Lorox® DF™ Herbicide is recommended for weed control in hybrid poplar plantings.

HOW TO USE

Apply to 2 to 4 lbs. Lorox® DF™ per acre before bud break in the spring.

For application after bud break, apply 2 to 4 lbs. Lorox® DF™ per acre as a directed spray. Spray should be directed weed growth and to avoid contact with the poplar plant; do not spray over the top of the poplar as injury to the plant will result.

Use the lower rate on light soils and higher rate on heavier soils. For best results on emerged weeds, treat at the seedling stage.

More than one treatment may be made but no more than 8 lbs. Lorox® DF™ per acre should be applied per year.

IMPORTANT

BEFORE USING LOROX® DF™, READ AND CAREFULLY OBSERVE THE CAUTIONARY STATEMENTS AND ALL OTHER INFORMATION APPEARING ON THE PRODUCT LABEL.

This bulletin contains new or supplemental instructions for use of this product which may not appear on package. Follow the instructions carefully.

This labeling must be in the possession of the user at the time of pesticide application.
