

GENERAL INFORMATION

Du Pont "Velpar" "Gridball" 1cc Brush Killer is a special pelletized product to be distributed in a random grid pattern on the soil surface in non-crop-land areas for control of undesirable woody plants. Rainfall dissolves the pellets and moves the herbicide into the root zone of the woody plants where it is absorbed during periods of active plant growth.

Symptoms of herbicidal activity generally appear within 3 to 4 weeks after sufficient rainfall has carried the herbicide into the root zone. Defoliation and subsequent refoliation may occur, but susceptible plants are killed. "Velpar" "Gridball" 1cc Brush Killer controls many woody plants including dogwood*, cherry*, elm, hawthorn, hickory*, hornbeam, maple, red oaks (such as bluejack oak, blackjack oak, southern red oak, turkey oak, and water oak), white oak, post oak, sweet gum, and wild plum. Recommended rates also provide partial kill or suppression of sourwood.

The degree of control and duration of effect will vary with the amount of product applied, soil type, rainfall, timing of application, and other conditions.

*Considered hard to kill

VELPAR[®]

GRIDBALL 1CC

BRUSH KILLER

ACTIVE INGREDIENT:
Hexazinone [3-cyclohexyl-6-(dimethylamino)-1-methyl-1,3,5-triazine-2,4(1H,3H)dione] . . . 20

INERT INGREDIENTS 80

U.S. Pat. 3,300,876 & 3,583,110 EPA Reg. No. 352

ACCEPTED

JAN 26 1981

Under the Federal Insecticide, Fungicide, and Rodenticide Act

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Do not re-use container. Bury empty container, or product that cannot be used, in a safe place away from water supplies, or dispose of by alternative procedures recommended by federal, state or local authorities. Open dumping is prohibited.

Keep out of reach of children.

Precautionary Statements
Hazards to Humans and Domestic Animals

CAUTION! Avoid contact with skin, eyes, and clothing. In case of contact, flush skin or eyes with plenty of water; for eyes, get medical attention if irritation persists.

Environmental Hazards

Keep out of any body of water. Do not apply where runoff is likely to occur. Do not contaminate water by cleaning of equipment or disposal of wastes.

IMPORTANT—Injury to or loss of desirable trees or other plants may result from failure to observe the following: Do not apply or empty equipment near desirable trees or other plants, or on areas where the roots may extend, or in locations where the chemical may be washed or moved into contact with the roots. Do not use on lawns, walks, driveways, tennis courts, or similar areas. Prevent contact with desirable plants. Keep from contact with fertilizers, insecticides, fungicides, and seeds. Thoroughly clean all traces of "Velpar" "Gridball" 1cc Brush Killer from application equipment immediately after use. Wash equipment thoroughly with water.

NOTICE TO BUYER

Purchase of this material does not confer any rights under patents of countries outside of the United States.

NOTICE OF WARRANTY

Du Pont warrants that this product conforms to the chemical description thereof and is reasonably fit for purposes stated on such label only when used in accordance with directions under normal use conditions. It is impossible to eliminate all risks inherently associated with use of this product. Ineffective or unintended consequences may result because of such factors as weather, presence of other materials or the manner of use or application, all of which are beyond the control of Du Pont. In no case shall Du Pont be liable for consequential or indirect damages resulting from the use or handling of this product. All such damages shall be assumed by the Buyer. DU PONT MAKES NO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE NOR ANY OTHER EXPRESS WARRANTY EXCEPT AS STATED ABOVE.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Distribute the pellets by hand on the soil surface just before the period of active growth of the brush species to be controlled to prevent contact with skin.

The spacing between the pellets determines the rate of application. To apply 5 lbs. per acre, pellets must be spaced approximately 4 1/2 ft. apart in each direction on the soil surface; for 10 lbs. per acre, 4 1/4 ft. apart; for 15 lbs. per acre, 4 ft. apart; and for 20 lbs. per acre, 3 1/2 ft. apart. Good results are obtained if distribution is nearly uniform and spacing is accurate.

Non-Cropland Areas — Arkansas, Louisiana, Eastern Texas, and Texas, and East of the Mississippi River — Railroad, Utility Line Right-of-Ways, Petroleum Tank Farms, Storage Areas, Pipeline Sites, Drainage Ditchbanks, and other similar areas.

Apply 5 to 20 lbs. per acre to control susceptible brush species. Higher levels of the recommended dosage range under the following conditions: on hard-to-kill species; on fine-textured soils; and on soils containing more than 5% organic matter. Seedling hardwoods with roots not extending into treated areas will be controlled.
