SUPPLEMENTAL LABELING

OUST® HERBICIDE FOR ROUGH TURF

OUST® HERBICIDE

EPA REG. NO. 352-401

FOR "CHEMICAL MOWING" IN ROUGH TURF ON INDUSTRIAL SITES

DIRECTIONS

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Du Pont "Oust" Herbicide is recommended for application through the "Lucas" 64 System for chemical mowing of rough turf on airport grounds, levee rights-of-way, petroleum tank farms and pipeline rights-of-way. Chemical mowing should be used where it is desirable to knock down rank growth of established rough turf and hold it at a desired level for an extended time. "Oust" provides suppression of certain types of rough turf plus weed control (see package label) to reduce the frequency of mowings.

APPLICATION

Apply at rates as directed on the container label of "Oust" under the section Turf (Industrial, Unimproved Only). Use the "Lucas" 64 System using spray volumes of 1 to 5 gals water per acre.

Use the lower use rates and lower carrier volumes indicated in sensitive turf stands, such as bahiagrass, and where weed pressure is low. Use the higher rates and higher carrier volume when perennial weeds predominate and weed pressure is high.

Extreme care must be taken to prevent drift or runoff to homesteads, desirable plantings, agricultural crops, or any body of water. Do not apply when weather favors drift or runoff from treated areas.

IMPORTANT

BEFORE USING "OUST", READ AND CAREFULLY OBSERVE THE CAUTIONARY STATEMENTS AND ALL OTHER INFORMATION ON THE PRODUCT LABEL.

This bulletin contains new or supplemental instructions for use of the product which may not appear on the package label. Follow the instructions carefully.

This labeling must be in the possession of the user at the time of pesticide application.
