

"TELAR" HERBICIDE
EPA REG. NO. 352-404

SUPPLEMENTAL LABELING
"TELAR" HERBICIDE COMBINATIONS
FOR NON-CROP WEED CONTROL

DIRECTIONS FOR USE

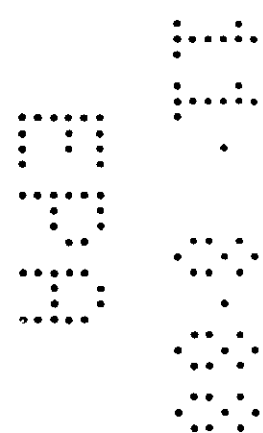

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Du Pont "Telar" Herbicide is recommended as a tank mix with other registered herbicides such as 2,4-D, "Banvel", "Roundup" and residual herbicides such as "Karmex"[1] or "Lexone"[1] for weed control on non-crop sites. The combinations provide broader spectrum weed control.

HOW TO USE

For broader spectrum weed control than offered by "Telar" alone, tank mixtures are recommended with registered herbicides such as 2,4-D, "Banvel", "Roundup" and residual herbicides such as "Karmex" or "Lexone". Refer to package labels and determine the weeds controlled that best fit the weed problem.

Apply the "Telar" plus companion herbicide at the rates and timing shown on the package labels for the weeds involved. For application method and other use specifications, use the most restrictive directions for the intended combination.

This bulletin contains new or supplemental instructions for use of these products in combination which does not appear on the package label. Follow the instructions carefully.

This labeling must be in the possession of the user at the time of pesticide application.
