CANVAS® HERBICIDE

EPA Reg. No. 352-586

REDUCED ROTATION INTERVAL FOR CONDIMENT MUSTARD AND CHICKPEAS (GARBANZO BEANS) IN THE STATES OF IDAHO, OREGON, AND WASHINGTON

DIRECTIONS FOR USE

It is violation of federal law to use this product in a manner inconsistent with its labeling.

Du Pont ALLY® and CANVAS® Herbicides are selective post-emergence herbicides recommended for control of broadleaf weeds in wheat, barley, pasture, rangeland and fallow.

HOW TO USE

In wheat, barley and fallow where 1/10 oz per acre of ALLY® or up to 1 packet per 5 acres of CANVAS® has been applied, the following minimum crop rotation interval* can be followed:

Soil pH	Minimum precipitation between application and planting	Rotation interval in months*
7.3 or lower	10 inches	10
7.4 or higher	28 inches	34

* The rotation interval represents the period of time from the last application to the anticipated date of the next planting. Rotation intervals must be extended 1 crop season if drought conditions prevail after application and before the rotational crop is planted, unless a successful field bioassay has been completed (see ALLY® and CANVAS® labels for details).

RESTRICTIONS

Wherever ALLY® or CANVAS® is used on land previously treated with GLEAN® FC, FINESSE®, Amber¹, Assert², or other longer residual herbicides having the same mode of action, read the rotational guidelines on both labels and follow the one with the longest interval stated for your situation before choosing to rotate to crops other than wheat or barley.

IMPORTANT

BEFORE USING ALLY® OR CANVAS®, READ AND FOLLOW ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS ON THE EPA-REGISTERED LABEL.

This bulletin contains new or supplemental instructions for use of this product which do not appear on the EPA-registered package label. Follow the instructions carefully.

This label must be in the possession of the user at the time of pesticide application.
