FOR CONTROL OF FLORIDA
BEGGARWEED ON SOUTHERN
RUNNER VARIETY PEANUTS**
CLASSIC® HERBICIDE

EPA Reg. No. 352-436

FOR CONTROL OF FLORIDA BEGGARWEED ON SOUTHERN RUNNER VARIETY PEANUTS
DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with labeling.

Do not apply this product through any type of irrigation system.

HOW TO USE

Du Pont "Classic" Herbicide is recommended for use on "Southern Runner" variety of peanuts at the rate of 1/2 ounce per acre for the control of Florida beggarweed.

Make a single postemergence application of 1/2 ounce per acre of "Classic" by air or ground for control of actively growing Florida beggarweed. Apply before Florida beggarweed has begun to bloom and prior to exceeding 10 inches in height. Applications made to Florida beggarweed in bloom and/or taller than 10 inches may result in only partial control (suppression).

"Classic" can be applied from 60 days after crop emergence to within 45 days of harvest. Where peanut emergence is erratic, or stands have been replanted, do not apply "Classic" until 60 days after the youngest peanuts have emerged. Do not make more than 1 application per season.

A surfactant must be included in the spray solution at 1 quart per 100 gallons of water (0.25% v/v) of at least 80% active ingredient. Do not use a crop oil concentrate, or vegetable oil as crop injury will result. Do not use "Classic" with the surfactant "LI-700" as poor control of Florida beggarweed will result.

Refer to the "Classic" label for use directions, use restrictions, rotational considerations, and precautions.

NOTE: "Classic" may cause reduction in peanut growth. Test data on Southern Runner variety have shown no adverse effects on yields from this temporary reduction in vine length.

RESTRICTIONS

Do not apply within 45 days of harvest.

Do not graze treated fields or harvest for hay.

Do not apply "Classic" to Southern Runner variety peanuts growing under stress resulting from weather (drought), insects, nematodes, previous herbicide injury, or disease.

DO NOT APPLY "CLASSIC" TO SOUTHERN RUNNER VARIETY PEANUTS IN A TANK MIX WITH 2,4-DB.

DO NOT APPLY "CLASSIC" TO SOUTHERN RUNNER VARIETY PEANUTS IN TANK MIXES WITH SULFUR OR PRODUCTS CONTAINING SULFUR AS EXCESSIVE CROP INJURY CAN RESULT.

Florida beggarweed more than 10 inches tall in height, blooming, or regrowing as a result of mechanical injury (mowing or cultivation) may be only partially controlled (suppressed).

IMPORTANT - BEFORE USING "CLASSIC", READ AND CAREFULLY OBSERVE THE CAUTIONARY STATEMENTS AND ALL OTHER INFORMATION APPEARING ON THE PRODUCT LABEL.

This bulletin contains new or supplemental instructions for use of this product which may not appear on the package label. Follow the instructions carefully.

This labeling must be in the possession of the user at the time of application.
