

# ESCORT® HERBICIDE

EPA REG. NO. 352-439

## FOR CONTROL OF KUDZU IN LOBLOLLY PINE PLANTATIONS

### DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Du Pont "Escort" Herbicide is recommended where loblolly pine is to be planted or has been established for at least 1 year on sites infested with kudzu in AL, AR, FL, GA, KY, LA, MS, NC, SC, TN, TX, and WV.

Apply 4 ounces "Escort" per acre; add a nonionic surfactant (80% active) at 1 qt/100 gals spray mix. Apply after full foliation of kudzu. Application should be made with sufficient volume to thoroughly wet the kudzu canopy from top to bottom with crossing passes of 45 to 90 degrees. A minimum of 30 gals water per acre per pass by ground equipment should be used, totaling 60 gal per acre.

Retreatment may be necessary. Retreat the area one year after the initial treatment. Broadcast application should be utilized if resprouting of kudzu root-crowns are less than 20 feet apart. If root-crowns are greater than 20 feet, spot application may be utilized. Failure to treat escaped or border patches of kudzu will result in reinvasion over the entire treated area in subsequent years.

#### Note:

1. Do not apply where conifers are suffering from loss of vigor caused by insects, disease, drought, winter damage, or other stresses, as injury may result.

2. Use on coarse textured, gravelly or rocky soils or exposed subsoils may result in conifer injury.
3. Do not use on poorly drained or marshy sites; however, pine on raised beds may be treated.
4. Temporary distortion of tip growth of pine may occur.
5. See "Escort" container labeling for sprayer clean-out instructions.
6. Follow all restrictions on labeling of both products.

### IMPORTANT

**BEFORE USING "ESCORT", READ AND CAREFULLY NOTE THE CAUTIONARY STATEMENTS AND ALL OTHER INFORMATION APPEARING ON THE PRODUCT CONTAINER LABELS.**

This bulletin contains new or supplemental instructions for use of these products in combination which does not appear on the package label. Follow the instructions carefully.

This labeling must be in the possession of the user at the time of pesticide application.
