

ASSURE® HERBICIDE

EPA REG. NO. 352-441

FOR NONCROP USAGE

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Du Pont "Assure" Herbicide is recommended for postemergence usage to control certain grasses on noncrop sites such as fence rows, roadsides, equipment storage areas, and other similar areas.

Since "Assure" Herbicide (as registered) controls many grasses but not most broadleaf plants, it may be used to enhance establishment and growth of certain broadleaf plants on non-crop sites (that is, plants identified as "wildflowers" such as indian blanket, cone flowers, bachelor button, dwarf cornflower, coreopsis, white yarrow, oxeye daisy, damesrocket, blue flax, eveningprimrose, blackeyed-susan, marigolds, immatians, bluebonnet, indian paintbrush, verbena, gaillardia, chrysanthemum, catchfly and scarlet pimpernel).

HOW TO USE

To aid in the establishment of broadleaf wildflowers, apply 15 to 32 fl. ozs "Assure" (1 to 2 pts) per acre (plus a nonionic surfactant).

Apply postemergence to early growth stages of the grasses to be controlled (see container labeling).

APPLICATION AND MIXING

Use a spray volume of no less than 10 nor more 40 gallons water per acre.

Mix the selected rate of "Assure" (1 to 2 pints/acre) in the per acre spray volume chosen (10 - 40 gals); add a nonionic surfactant (80% active) at 1 to 2 pt. per 100 gals spray mix.

Use flat fan nozzles and thoroughly cover the grass foliage.

Note: Do not allow spray to drift on to adjacent crops as injury to plants (other than soybeans) will likely occur. When spraying close to adjacent crops or plants, do everything possible to reduce the occurrence of off-target spray movement such as:

- Increase spray volume
- Use lower sprayer pressure (but not less than 20 psi).
- Add an appropriate drift control agent.
- Stop spraying if wind speed becomes excessive

IMPORTANT

BEFORE USING "ASSURE", READ AND CAREFULLY OBSERVE THE CAUTIONARY STATEMENTS AND ALL OTHER INFORMATION APPEARING ON THE PRODUCT LABEL.

This bulletin contains new or supplemental instructions for use of this product which may not appear on the package label. Follow instructions carefully.

This labeling must be in the possession of the user at the time of application.
