PREVIEW® HERBICIDE

EPA REG. NO. 352-448

REDUCED RATE FOLLOWED BY "CLASSIC" HERBICIDE AND/OR "PINNACLE" HERBICIDE

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product through any type of irrigation system.

For use on soybeans only.

HOW TO USE

Du Pont "Preview" Herbicide may be applied preplant incorporated or preemergence at reduced rates when followed by Du Pont "Classic" Herbicide, Du Pont "Pinnacle" Herbicide or a tank mix of "Classic" plus "Pinnacle" for postemergence broadleaf weed control in soybeans. This treatment will control those broadleaf weeds listed on the "Preview", "Classic" and "Pinnacle" product labels.

Apply "Preview" at reduced rates (see table below) preplant incorporated or reemergence as directed on the "Preview" product label. Follow the "Preview" preplant incorporated or preemergence reduced rate with a postemergence application of "Classic", "Pinnacle" or a tank mix of "Classic" plus "Pinnacle" at labeled rates when weeds are small and actively growing. This is usually 14 -28 days after preplant incorporated or preemergence application of "Preview".

Refer to the "Preview", "Classic" and "Pinnacle" product labels for specific use instructions, limitations, precautions, and rotational crop restrictions.

For grass weed control "Preview" can be applied in a tank mix with or following an application of alachlor (such as Lasso), trifluralin (such as Trellan), Dual, Prowl, or Sonalan. Read and follow the product label for use of these products.

IMPORTANT

BEFORE USING "PREVIEW", "CLASSIC", OR "PINNACLE" HERBICIDES READ AND CAREFULLY OBSERVE THE CAUTIONARY STATEMENTS AND ALL OTHER INFORMATION APPEARING ON THE PRODUCT LABEL.

This bulletin contains new or supplemental use for these products which may not appear on the package labels. Follow the instructions carefully.

This labeling must be in possession of the user at the time of application.
