DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. DuPont "Manzate" 200 DF fungicide is recommended for the control of Karnal Bunt on wheat.

HOW TO USE

Apply Manzate 200 DF as a seed treatment at the rate of 3.3 oz/100 lbs of seed. The seed treatment application must be followed by foliar applications. Apply 2 lbs of Manzate 200 DF per acre at extended flag leaf; repeat 7-days later (early heading -- Feekes 10.2). If conditions continue to be favorable for Karnal Bunt infection, repeat 7 days later (Feekes 10.5).

For best results in controlling Karnal Bunt, follow the complete treatment regime described above; a seed treatment followed by 2-3 foliar treatments.

Make no more than three foliar applications of MANZATE 200 DF for a total of 6 lbs per acre per crop.

Make no applications within 26 days of harvest.

Do not graze livestock in treated areas prior to harvest.

Do not hold seed treated with Manzate 200 DF to plant the next season. Plant seed treated during the same season.

IMPORTANT

BEFORE USING MANZATE 200 DF, READ AND FOLLOW ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS ON THE EPA-REGISTERED LABEL.

This bulletin contains new or supplemental instructions for use of this product which do not appear on the EPA-registered package label. Follow the instructions carefully.

This labeling must be in the possession of the user at the time of pesticide application.
