VENDEX® 50WP MITICIDE

(EPA Reg. No. 352 - 480)

FOR CONTROL OF SPRUCE SPIDER MITE IN CHRISTMAS TREE PLANTATIONS IN THE STATES OF OREGON AND WASHINGTON

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

CROP	MITES CONTROLLED	LB/ACRE*	MINIMUM MAXIMUM GAL/ACRE	PREHARVEST INTERVAL (DAY'S)
Christmas trees	Spruce Spider	2	Ground Min. 20 Aerial Min. 10	NA
* One pound of product is equal to one soluble packed† of product. * Minimum application per year. * For best results apply with Airblast ground equipment. * Aerial Application * Best results by air are obtained when the pilot applies 1/2 the dosage in one direction, then finishes by respraying in a pattern perpendicular to the first application.				

* One pound of product is equal to one soluble packed† of product.

SPRAY PREPARATION

Agitation is required during mixing and spraying. Add surfactant after the DuPont VENDEX 50 WP Miticide is thoroughly dispersed in the spray tank. If foaming of the spray mix becomes a problem, add an antifoaming agent.

GENERAL INFORMATION

VENDEX 50 WP works best when mite populations are low and mites are active.

VENDEX 50WP is a contact miticide, therefore thorough coverage of new growth is essential.

Sensitivity of all varieties of evergreens grown for Christmas tree production is not known. Although no injury has been observed in research tests, it is suggested a test application be made prior to general practice.

Do not apply this product through any type of irrigation system.

IMPORTANT

BEFORE USING "VENDEX" 50WP. READ AND FOLLOW ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS ON THE EPA-REGISTERED LABEL.

This bulletin contains new or supplemental instructions for use of this product which do not appear on the EPA-registered package label. Follow the instructions carefully.

This label must be in the possession of the user at the time of pesticide application.
