Mr. Jack H. Cain  
 E.I. du Pont de Nemours and Company, Inc.  
 Walker's Mill, Barley Mill Plaza  
 P.O. Box 80038  
 Wilmington, Delaware 19880-0038

Dear Mr. Cain:

Subject: Supplemental Label Amendment - Tank Mixture with Banvel  
 and 2,4 D for Postemergence Weed Control in Durum Wheat  
 DuPont Express Herbicide  
 EPA Registration Number 352-509  
 Your Submission Dated May 16, 1993

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable. A stamped copy is enclosed for your records. Please submit three (3) copies of final printed labeling.

Sincerely yours,

Joanne L. Miller  
 Product Manager (25)  
 Fungicide-Herbicide Branch  
 Registration Division (7505C)

## AGRICULTURAL PRODUCTS

*..... A Growing Partnership With Nature*

## SUPPLEMENTAL LABELING

**EXPRESS® HERBICIDE  
IN COMBINATION WITH BANVEL®  
AND 2,4-D FOR WEED CONTROL  
IN DURUM WHEAT**

### EXPRESS® HERBICIDE

EPA Reg. No. 352-509

#### TANK MIXTURE WITH "BANVEL" AND 2,4-D FOR POSTEMERGENCE WEED CONTROL IN DURUM WHEAT (ONLY)

#### DIRECTIONS FOR USE

It is in violation of federal law to use these products in a manner inconsistent with their labeling.

DuPont "Express" Herbicide may be applied in tank mix with formulations of "Banvel" and 2,4-D that are registered for use on Durum wheat in accordance with their labels. Observe all applicable directions, restrictions and precautions on labels of all products used.

This 3-way combination provides postemergence activity and offers potential for short-term residual control or suppression of labeled weeds. Degree of control and duration of effect depend on weed spectrum and density; weed size and variability; amount of canopy cover; growing conditions prior to, at and following application; amount and timing of precipitation and spray coverage.

#### USE RATE

"Express" 1/8 - 1/3 oz + 2 - 3 oz "Banvel" (4 - 6 oz "Banvel" SGF) + 4 - 6 oz active 2,4-D Ester or Amine (based on 4 lb ai/gallon formulation) per acre. Use higher rates when weed infestation is heavy.

#### CROP STAGE AT APPLICATION

Apply this 3-way combination after the crop is tillering and before the Durum exceeds the 5-leaf stage.

#### PRECAUTIONS

Do not apply this 3-way mixture at high rates more than once a year or more than twice per year at the low rates. Do not exceed 1/3 oz "Express" per acre per crop year.

Read and follow "Express" product label directions for crop rotation guidelines - any crop may be planted 60 days following application.

#### IMPORTANT

**BEFORE USING "EXPRESS" IN COMBINATION WITH "BANVEL" AND 2,4-D, READ AND CAREFULLY OBSERVE THE CAUTIONARY STATEMENTS AND ALL OTHER INFORMATION APPEARING ON THE PRODUCT LABELS.**

This bulletin contains new or supplemental instructions for use of these products which may not appear on the package labels. Follow the instructions carefully.

This labeling must be in the possession of the user at the time of pesticide application.
