OFFICE OF PESTICIDES PROGRAMS
REGISTRATION DIVISION (75-267)
WASHINGTON, DC 20460

EPA REGISTRATION #

DATE OF ISSUANCE

TERM OF ISSUANCE

APR 13 1989

NOTICE OF PESTICIDE:

REGISTRATION
RENEWAL

Under the Federal Insecticide, Fungicide, and
Rodenticide Act

NAME OF PESTICIDE PRODUCT

NAME AND ADDRESS OF REGISTRANT

108 / 241305
17 / 2

NOTE: Changes in labeling from the information statement that accepted in connection with this registration must be submitted and accepted by the Registration Division prior to use of the labeling on the product. If any correspondence on the product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an endorsement or approval of this product by the Agency. In order to protect health and the environment, the Administrator, in his or her discretion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. Use of the name of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

panel of the labeling. In addition, the child signal wording should read as follows:

KEEP OUT OF REACH OF CHILDREN
CAUTION

See back panel for additional precautionary statements and statement of practical treatment.

5. In the Statement of Practical Treatment, the inhalation statement should read as follows:

If inhaled - Remove victim to fresh air. Apply artificial respiration if necessary.

6. Revise the Environmental Hazards statement to read as follows:

This product is toxic to fish and aquatic invertebrates. Do not apply to water or wetlands (swamps, bogs, marshes, and potholes). Drift and runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment washwaters.

7. Include the following statement at the beginning of the reentry statement:

Do not apply this product in such a manner as to directly or through drift expose workers or other persons. The area being treated must be vacated by unprotected persons.

8. For protective clothing, add the following statements:

Protective Clothing For Safety

USE ONLY WHEN WEARING THE FOLLOWING PROTECTIVE CLOTHING AND EQUIPMENT DURING MIXING/LOADING, APPLICATION, REPAIR AND CLEANING OF MIXING, LOADING, AND APPLICATION EQUIPMENT, DISPOSAL OF THE PESTICIDE, AND EARLY REENTRY INTO TREATED AREAS before sprays have dried. Protective suit of one or two pieces covering all parts of the body except head, hands, and feet; chemical resistant gloves; chemical resistant shoes (or chemical resistant shoe covers or chemical resistant boots).

IF APPLICATION IS PERFORMED USING AN ENCLOSED CAB, THE FOLLOWING PROTECTIVE CLOTHING AND EQUIPMENT MAY BE WORN AS AN ALTERNATIVE: Long-sleeved shirt and long-legged pants; shoes and socks. Chemical resistant gloves must be available in the cab or cockpit and must be worn when exiting. This clothing is inadequate to protect you during equipment repair or cleaning, reentry, or pesticide disposal work.

IMPORTANT: If pesticide comes in contact with skin, wash off with soap and water. Always wash hands, face, and arms with soap and water before smoking, eating, drinking, or toileting.

AFTER WORK: Before removing gloves, wash them with soap and water. Take off all work clothes and shoes. Shower using soap and water. Wear clean clothes. Do not reuse contaminated clothing. Personal clothing worn during work must be laundered separately from household items. Store protective clothing separate from personal clothing. Clean or launder protective clothing after each use. Protective clothing and equipment that becomes heavily contaminated must be destroyed according to State and local regulations. HEAVILY CONTAMINATED CLOTHING CANNOT BE ADEQUATELY DECONTAMINATED.

Submit one (1) copy of your final printed labeling before you release the product for shipment.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

KEEP OUT OF REACH OF CHILDREN

CAUTION

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION! MAY IRRITATE EYES, NOSE, THROAT AND SKIN; HARMFUL IF INHALED

Avoid breathing dust. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before eating or smoking. Remove contaminated clothing and wash with soap and water before reuse. Do not apply this product in such a manner as to directly or through drift expose workers, other persons or animals.

STATEMENT OF PRACTICAL TREATMENT

If in eyes: Flush with plenty of water. Get medical attention if irritation persists.

If on skin: Wash thoroughly with soap and water. Get medical attention if irritation persists.

If inhaled: Remove victim to fresh air and apply artificial respiration if there is difficulty in breathing.

If swallowed: Call a physician or Poison Control Center. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person.

For medical emergencies involving this product, call toll free 1-800-441-3637.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and aquatic invertebrates. Do not apply directly to water or wetlands (swamps, bogs, marshes, and potholes). Drift and runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water by cleaning of equipment or disposal of wastes.

GENERAL INFORMATION

Du Pont "Savey" Miticide is recommended for use as a foliar application in pears. It is a 50% wettable powder formulation to be mixed with water and applied as a spray. It is noncorrosive to equipment and is nonflammable.

"Savey" is an effective miticide providing control of major economically important mites that affect pear. The degree and duration of control is dependent on rate used, growth stage of the mite, species of mite, and climatic conditions under which the material is being applied.

"Savey" Miticide is a highly active mite ovicide and larvicide. Control is achieved from either direct contact with the spray or from contact with treated plant surfaces. "Savey" also affects adult female mites by rendering their eggs inviable.

IMPORTANT

Wear clean clothes daily. Wash thoroughly after handling and before eating or smoking. Keep animals and unprotected persons out of operational areas during treatment and while weather conditions favor drift from areas treated. Not for use or storage in or around the home.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Du Pont "Savey" Miticide should be used only in accordance with recommendations on this label. Du Pont will not be responsible for losses or damages resulting from use of this product in a manner not specifically recommended by Du Pont. User assumes all risks associated with such nonrecommended use.

"Savey" is a 50% wettable powder to be diluted with water for application by ground equipment. Use only in commercial plantings, do not use in home plantings.

Do not apply this product through any type of irrigation system.

Reentry Statement

Do not enter treated areas without appropriate protective clothing until sprays have dried. Because certain states may require more restrictive reentry intervals for areas treated with this product, consult your State Department of Agriculture for further information. Written or oral warnings must be given to workers who are expected to be in a treated area or in an area about to be treated with this product. When oral warnings are given, warnings shall be given in a language customarily understood by workers. Oral warnings must be given if there is reason to believe that written warnings cannot be understood by workers. Written (or oral) warnings must include the following information: "CAUTION - Area treated with "Savey" on (date of application) Do Not Enter Treated Areas Without Appropriate Protective Clothing Until Sprays Have Dried."

Managing Mite Resistance

Repeated use of miticides with similar modes of action may lead to build-up of resistant strains of mites. For good resistance management practices, Du Pont recommends that the ovicide/larvicide "Savey" be applied only once per year. If "Savey" has been applied, do not apply another ovicide such as "Apollo" in the same year. If "Apollo" has been applied, do not apply "Savey" in the same year. If additional miticide applications are needed, use a miticide with a different mode of action such as the contact adulticide "Vendex" or "Vydate".

IMPORTANT

PROPER TIMING - With its activity being predominately ovicidal/larvicidal, "Savey" should be applied after bloom but prior to adult mite buildup (0-0.5 mites/leaf). If adult mites are present (greater than 0.5 mites/leaf), apply "Savey" in combination with a registered contact adulticide such as "Vendex" or "Vydate".

PROPER MIXING

Fill tank 1/2 full with water and, with agitator running, add proper amount of "Savey". Finish adding the required amount of water. Continuous agitation is required to keep the product in suspension.

Compatibility - Before full-scale mixing of "Savey" with other products, test mix small proportionate quantities of each to ensure compatibility. Tests have shown "Savey" may be incompatible with some EC formulations. Addition of a compatibility agent such as "Unite" may improve compatibility with those products.

SPRAY VOLUME

Ground Application: Use sufficient water to obtain thorough, uniform coverage; 150-800 gallons per acre for dilute application, 50-150 gallons per acre for concentrated applications.

APPLICATION RATES

Apply the lower rates on low mite egg infestation levels and the high rates on moderate to high mite egg infestation levels or to larger trees. Use one application per growing season.

The following mites should be controlled at the given rate range.

Crop	Mite	Rate oz. Form./Acre	Treatment Schedule
Pear	European red	4.0 - 6.0	See
	Two-Spotted spider	4.0 - 6.0	Proper
	McDaniel spider	4.0 - 6.0	Timing

Do not apply more than a total of 6 oz. formulated product per acre in one growing season.

RESTRICTIONS

Do not graze or feed livestock on cover crops growing in treated areas. Do not apply within 28 days of harvest.

STORAGE AND DISPOSAL

Storage: Store product in original container only away from other pesticides, fertilizer, food or feed.

Product Disposal: Do not contaminate water, food or feed by storage or disposal. Wastes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility.

Container Disposal: Completely empty container into application equipment. Then dispose of empty container in a sanitary landfill or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

NOTICE TO BUYER - Purchase of this material does not confer any rights under patents of countries outside of the United States.

NOTICE OF WARRANTY

Du Pont warrants that this product conforms to the chemical description on the label thereof and is reasonably fit for the purposes stated on such label only when used in accordance with the directions under normal use conditions. It is impossible to eliminate all risks inherently associated with the use of the product. Crop injury, ineffectiveness, or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of Du Pont. In no case shall Du Pont be liable for consequential, special or indirect damages resulting from the use or handling of this product. All such risks shall be assumed by the buyer. DU PONT MAKES NO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE NOR ANY OTHER EXPRESSED OR IMPLIED WARRANTY EXCEPT AS STATED ABOVE.
