Barley Mill Plaza, Walker's Mill  
Wilmington, DE 19880

Subject: Label Amendment Submission of 05/20/93 in Response to PR Notice 93-7  
EPA Reg. No. 352-543  
NEW LOROX PLUS HERBICIDE

Dear Registrant:

The labeling cited above and submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, is accepted subject to the comments reflected on the enclosed sheet. A copy of your proposed labeling stamped "ACCEPTED WITH COMMENTS" is enclosed.

**WHAT THIS ACCEPTANCE MEANS:**

Based on your certification, the Agency has accepted the labeling changes that are necessary to comply with the Worker Protection Standard (WPS) labeling requirements of 40 CFR part 156, subpart K, described in PR Notices 93-7 and 93-11. Any other labeling changes submitted in connection with this amendment application but not directly related to compliance with the WPS have not been reviewed or accepted by the Agency. If you wish to make such changes, you must submit a separate amendment application proposing them. If your product is currently suspended, the acceptance of this labeling amendment does not affect the suspension in any way.

**WHAT YOU NEED TO DO NEXT:**

By the next label printing make all the specified changes to your labeling. Send to EPA one (1) copy of the final printed labeling:

- BEFORE selling or distributing any product bearing the final printed labeling
- AND
- WITHIN one year from date of this acceptance.

Recycled/Recyclable  
Printed with Soy/Canola Ink on paper that  
contains at least 50% recycled fiber

Submit the final printed labeling via the U.S. Postal Service to:

Document Processing Desk (FIN-LABEL)  
Office of Pesticide Programs (7505C)  
U.S. Environmental Protection Agency  
401 M Street, SW  
Washington, D.C. 20460-0001

Hand or courier deliveries of final printed labeling may be made to:

Document Processing Desk (FIN-LABEL)  
Office of Pesticide Programs  
Room 266A, Crystal Mall 2  
1921 Jefferson Davis Highway  
Arlington, VA 22202

Sincerely,

A handwritten signature in black ink, appearing to read "Jim Tompkins", written over the typed name and title.

Jim Tompkins, Deputy Chief  
Registration Support Branch  
Registration Division (7505W)

BARLEY MILL PLAZA, WALKER'S MILL  
WILMINGTON DE 19880

Comment for: EPA Reg Nr.352-543  
NEW LOROX PLUS HERBICIDE

The following specific comments pertain to your WPS labeling submission concerning the product cited above:

User Safety Recommendations must either be placed in a box or printed on the label in a contrasting color from surrounding text.

Add the following User Safety Recommendation to the label in the location shown in Section A on Part 1 of the Product Worksheet in Supplement Three-A to PR Notice 93-7: "Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing."

Correct the typographical errors circled on your proposed label.

# NEW LOROX PLUS®

## HERBICIDE

DISPERSIBLE GRANULES

### FOR USE ON SOYBEANS ONLY

BY WEIGHT

<b>ACTIVE INGREDIENTS</b> .....	60%
Linuron: [3-(3,4-dichlorophenyl)-1-methoxy-1-methylurea] .....	56.9%
Chlorimuron Ethyl: Ethyl 2-[[[(4-chloro-6-methoxypyrimidin-2-yl)amino]carbonyl]-amino]sulfonyl]benzoate .....	3.1%

**INERT INGREDIENTS** ..... 40%

**TOTAL** ..... 100%

EPA Reg. No. 352-543

U.S. Pats. 4,394,506 & 4,547,215

### KEEP OUT OF REACH OF CHILDREN

## CAUTION

### PRECAUTIONARY STATEMENTS

#### HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**CAUTION !** Harmful if swallowed or absorbed through skin. Causes moderate eye injury. Avoid contact with skin, eyes and clothing. Avoid breathing dust or spray mist.

#### STATEMENT OF PRACTICAL TREATMENT

**If in eyes:** Flush with plenty of water and get medical attention if irritation persists.

**If on skin:** Wash with soap and water and get medical attention if irritation persists.

**If swallowed:** Call a physician or Poison Control Center. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person.

**For medical emergencies involving this product, call toll free 1-800-441-3637.**

#### PERSONAL PROTECTIVE EQUIPMENT

Applicators and other handlers must wear:

- Coveralls over short-sleeve shirt and short pants.
- Waterproof gloves.
- Shoes plus socks.
- Chemical-resistant headgear for overhead exposure.

ACCEPTED  
with COMMENTS  
In EPA Letter Dated

M/S  
Under the Federal Insecticide,  
Fungicide, and Rodenticide Act  
as amended, for the pesticide  
registered under EPA Reg. No.

352-543

Discard clothing or other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them. Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

#### ENGINEERING CONTROLS STATEMENTS

When handlers use closed systems or enclosed cabs in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR part 170 Section 170.240 (d)(4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

**BEST AVAILABLE COPY**

#### USER SAFETY RECOMMENDATIONS

**USER SHOULD:** Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.

#### ENVIRONMENTAL HAZARDS

Do not apply directly to water or wetlands (swamps, bogs, marshes and potholes). Do not contaminate water by cleaning of equipment or disposal of wastes.

## IMPORTANT

Injury to or loss of desirable trees or vegetation may result from failure to observe the following: Do not apply or drain or flush equipment on or near desirable trees or other plants, or on areas where their roots may extend, or in locations where the chemical may be washed or moved into contact with their roots. Do not use on lawns, walks, driveways, tennis courts, or similar areas. Prevent drift of spray to desirable plants. Do not contaminate any body of water. Keep from contact with fertilizers, insecticides, fungicides, and seeds during storage.

Prior to using "Lorox Plus", consideration should be given to crop rotation plans. Crops other than soybeans can be extremely sensitive to low concentrations of "Lorox Plus" remaining in the soil the next planting season. Choice of rotational crop is restricted following application of "Lorox Plus". (See "ROTATIONAL CROP GUIDELINES").

"Lorox Plus" is registered for use on soybeans only. Use on crops other than soybeans will result in severe crop injury or crop death.

## DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with the terms of the label.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

## AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

- Coveralls over short-sleeved shirt and short pants.
- Waterproof gloves.
- Shoes plus socks.
- Chemical-resistant headgear for overhead exposure.

Do not apply this product through any type of irrigation system.

**FOR USE ON SOYBEANS ONLY.**

## GENERAL INFORMATION

Du Pont "Lorox Plus" Herbicide is a dispersible granule formulation to be mixed with water and sprayed for selective preemergence weed control in soybeans. When applied according to the instructions on this label, it will control many broadleaf weeds and provide partial control of nutsedge.

Preemergence applications of "Lorox Plus" require rainfall or sprinkler irrigation to activate the herbicide. Degree of control and duration of effect depend on: rate used, weed spectrum, growing conditions at and following time of treatment, soil pH, texture, organic matter, moisture and precipitation.

Because most crops are highly sensitive to "Lorox Plus", all direct or indirect contact (such as spray drift) to crops or to land scheduled to be planted to crops other than soybeans should be avoided.

## BIOLOGICAL ACTIVITY

"Lorox Plus" rapidly inhibits the growth of susceptible weeds. Following preemergence treatment, susceptible weeds may germinate and emerge, but growth then ceases and leaves become yellow 3-5 days after emergence. Death of leaf tissue and growing point will follow in some species while others will remain green but stunted and noncompetitive. "Lorox Plus" provides partial control of some annual grasses, but other products may be needed to ensure adequate grass control.

## WEEDS CONTROLLED

When used as directed "Lorox Plus" will provide control of the following weeds:

Carpetweed	Prickly sida (teaweed)
Cocklebur*	Purslane
Eastern black nightshade**	Ragweed, common
Jimsonweed	Smartweeds, annual
Lambsquarters	Spotted spurge
Mustards	Velvetleaf
Pigweed species	
Palmer amaranth	
Redroot	
Smooth	
Spiny amaranth	
Tall waterhemp	

When used as directed "Lorox Plus" will provide partial control of the following weeds:

Burcucumber	Nutsedge species
Crabgrass species	Panicum species
Eastern black nightshade	Ragweed, giant*
Foxtail species	Sunflower*
Johnsongrass, seedling	
Morningglory, annual*	
Entireleaf	
Ivyleaf	
Pitted	
Tall	

**BEST AVAILABLE COPY**

- \* Large seeded weeds, germinating deep in the soil, such as morningglory, sunflower, cocklebur and giant ragweed or weeds with subsequent flushes may require a cultivation or an application of Du Pont Classic<sup>®</sup> Herbicide postemergent for season-long control. Consult "Classic" label for application directions, recropping intervals and use restrictions.

NOTE: Consult Lasso', Dual', Prowl', Treflan', Sonalan' or Surflan' labels for additional weeds controlled when "Lorox Plus" is used in conjunction with these herbicides.

\*\*Requires the addition of "Lasso".

## APPLICATION INFORMATION

### SPRAY TANK PREPARATION

It is important that spray equipment is clean and free of existing pesticide deposits before using "Lorox" Plus. Follow the spray tank cleanout procedures specified on the label of product previously sprayed. If no cleanout procedure is provided, follow the cleanout procedure below for all application equipment.

1. Thoroughly rinse sprayer, tanks, boom, and hoses with clean water.
2. Partially fill the tank with water and add one of the cleaning agents listed in the SPRAYER CLEANUP section of this label. Complete filling the tank and flush the cleaning solution through the boom and hoses. Let stand for 15 minutes with agitation or recirculation and then drain the tank after flushing the hoses, boom, and nozzles.
3. Thoroughly rinse sprayer, tanks, boom, and hoses with clean water.
4. Follow label directions of the product previously sprayed for rinsate disposal.

NOTE: During an extended period where spraying or mixing equipment will be used to apply multiple loads of "Lorox" Plus, at the end of each day of spraying partially fill the tank with fresh water, flush the boom and hoses and allow to sit overnight.

### EQUIPMENT / SPRAY VOLUMES

Apply uniformly by ground equipment with a properly calibrated low pressure (20 to 40 psi) fixed-boom sprayer equipped with fan-type nozzles or other carefully calibrated nozzles and screens no finer than 50 mesh. Use 10 to 40 gals of water per acre.

Continuous agitation in the spray tank is required to keep the material in suspension. Avoid overlap and shut off spray booms while starting, turning, slowing or stopping, as injury to the crop may result.

### MIXING INSTRUCTIONS

Fill tank 1/4 full with water. Start agitation system, add "Lorox Plus" and continue adding water. Add separately each additional component of any tank mix while adding water. Continue agitation throughout. If poor mixing should occur with any component, premix the component with two parts water before adding to the spray tank. A fertilizer solution may be used in the spray mixture. Small quantities should be tested for compatibility by the following procedures before full scale mixing.

1. Put 1 pint of fertilizer solution in quart jar.
2. Mix 2 teaspoons "Lorox Plus" with 2 tablespoons of water; mix thoroughly and add to fertilizer solution.
3. Close jar and shake well.
4. If other herbicides are to be used in the mixture, premix 2 teaspoons of wettable powder or 1 teaspoon of liquid with 2

697  
tablespoons of water, add to "Lorox Plus"/fertilizer solution mixture.

5. Close jar and shake well.
6. Watch mixture for several seconds; check again in 30 minutes.
7. If mixture does not separate, foam, gel or become lumpy, it may be used.
8. Mixing ability may be improved by adding compatibility agents such as Kalo Laboratories Compex' or Witco Chemicals Sponto' 168D. Follow directions on container.

Provided the above procedure shows the mixture to be compatible, prepare the tank mixture as follows: Add the fertilizer solution to the spray tank first; with the agitator running, add the required amount of "Lorox Plus" and thoroughly mix. For tank mixtures with other herbicides, follow directions above.

When tank mixing with other herbicides, all applicable directions, restrictions and precautions for the additional herbicides are also to be followed. Use "Lorox Plus" spray preparations the same day as mixed or product degradation may occur. Thoroughly reagitator before using if allowed to settle.

## APPLICATION METHODS

Dosage rates listed are broadcast rates. For band applications use proportionally less.

Plant seed 1 1/2" to 2" deep on a flat or raised seedbed only, or crop injury may occur.

Soybean stunting may occur if excessive rainfall occurs after application but before soybeans germinate. Injury is more prevalent under poor drainage or compacted conditions or when soil is saturated for long periods of time. Soybeans rapidly outgrow stunting once favorable growing conditions return.

NOTE: Seedling disease, nematodes, cold weather, deep planting (more than 2"), excessive moisture, high salt concentration or drought may weaken soybean seedlings and increase the possibility of crop injury.

### EARLY PREPLANT OR PREPLANT INCORPORATED (SEE RATE TABLE 1)

"Lorox Plus" can be applied at planting or up to 30 days prior to planting either preemergence or preplant incorporated. If incorporated, "Lorox Plus" should be uniformly incorporated no deeper than the top 1-2" of soil prior to planting soybeans. Use equipment suited for proper incorporation into the top 1-2 inches of soil e.g.: Do-all, field cultivator or Roterra. If tank-mixed with a grass herbicide, such as a DNA like "Treflan", "Sonalan", or acetanilide such as "Dual", or "Lasso", follow label instructions for proper incorporation of the grass herbicide into the top 1 to 2" of soil. Improper soil incorporation can result in erratic weed control or crop injury. Rainfall\* (-1") is required to activate preplant incorporated herbicides such as "Lorox Plus" before weed emergence.

Use of a disk for incorporation is not recommended.

### PREEMERGENCE(SEE RATE TABLE 1)

Apply before soybeans emerge. Do not spray over top of emerged soybeans or severe crop injury or crop death will occur.

**BEST AVAILABLE COPY**

Preemergence activity of "Lorox Plus" requires rainfall or irrigation to activate. Best results are obtained if treatment is made to moist soil and followed by rainfall or irrigation (1/2" to 1") before weeds germinate. On dry soil, chemical activation requires more moisture (1-2"). If moisture is insufficient to activate the herbicide, a rotary hoeing or shallow cultivation should be made after emergence of crop while weeds are small enough to be controlled by mechanical means. "Lorox Plus" can be applied preemergence in combination with "Lasso", "Dual", "Prowl", "Surflan" or following the use of a preplant grass material such as "Treflan", "Prowl" or "Sonalan". Consult labels for rates and use instructions.

**MINIMUM TILLAGE OR NO-TILL  
(SEE RATE TABLE 1)**

"Lorox Plus" applied preemergence to soybeans but postemergence to broadleaf weeds and small annual grasses will provide limited burndown of existing weeds. When used for burndown add a nonionic surfactant at a rate of 0.25% V/V surfactant (1 qt/100 gal) or crop oil concentrate at 1% V/V (1 gal/100 gal). For added postemergence control, especially on grasses, "Lorox Plus" can be applied with Roundup, paraquat or "Bronco". For added preemergence control, especially on grasses, "Lorox Plus" can be mixed with "Dual", "Lasso", or "Surflan". Consult labels for rates and use instructions.

Maintain constant agitation of spray mixture.

**RATE TABLE 1**

Soil Texture (1/2-3% Organic Matter*)	Rate (Ounces Per Acre)
<b>Coarse:</b>	
Loamy sand, Sandy loam	12 - 14
<b>Medium:</b>	
Loam, Silty loam, Silt	14 - 16
<b>Fine:</b>	
Silty clay loam, Clay loam, Clay	16 - 18

\* Do not apply to soil with less than 1/2% O.M.

Do not apply to soil with less than 1/2% O.M. Do not apply "Lorox Plus" to soils with pH greater than 6.8, unless the following rotational crop is soybeans or a Du Pont recommended chlorimuron ethyl resistant corn variety.

**Reduced rate followed by Classic® Herbicide**

"Lorox Plus" may be applied at a reduced rate when followed by a postemergence application of Du Pont's "Classic" Herbicide for broadleaf weed control.

Apply "Lorox Plus" preplant incorporated or preemergence at 12 ounces of product per acre to any soil texture with 1/2 to 3% organic matter as directed on this label. Follow the "Lorox Plus" preplant incorporated or preemergence reduced rate with a postemergence application of "Classic" Herbicide at it's labeled rate when weeds are small and actively growing. (Usually 14-28 days after preplant incorporated or preemergence application of "Lorox Plus" reduced rate.)

For grass weed control "Lorox Plus" can be tank mixed with grass herbicides such as "Dual", "Lasso", "Sonalan", "Treflan", "Prowl", or "Surflan". Consult labels for rates and use instructions for these products.

**"Lorox Plus" plus Preview® Herbicide Tank Mix for the States of IA, IL, IN, MI and OH.**

A tank mix, at reduced rates, of "Lorox Plus" and "Preview" Herbicide is recommended for weed control in soybeans in the states of Iowa, Illinois, Indiana, Michigan and Ohio. This tank mix will control those weeds listed on this label.

Apply the "Lorox Plus" and "Preview" tank mixture as a preplant incorporated (1-2 inches) or preemergence treatment. Follow the "Lorox Plus" label for incorporation guidelines and equipment recommendations. Make a single application using 10-40 gallons of water per acre by ground equipment only. DO NOT APPLY "LOROX PLUS" BY AIR.

Choose the proper rates from the rate table below.

**Important:** Read and follow all use precautions, restrictions and recropping guidelines on the "Lorox" Plus and "Preview" product labels.

**"Lorox Plus" plus "Preview" Rate Table**  
Ounces Product Per Acre

Soil Texture Description *	"Lorox Plus"	"Preview"
<b>Coarse:</b>		
Loamy sand, Sandy loam	6	3
<b>Medium:</b>		
Loam, Silty loam, Silt	7	3.5
<b>Fine:</b>		
Silty clay loam, Clay loam, Clay	8	4

\* Do not apply to soil with less than 1/2% or more than 3 1/2% organic matter.

Do not apply "Lorox Plus" to soils with pH greater than 6.8, unless the following rotational crop is soybeans or a Du Pont recommended chlorimuron ethyl resistant corn variety.

**ROTATIONAL CROP GUIDELINES**

Crops that can be planted after using "Lorox Plus" are listed below. Choice of rotational crop is determined by time interval elapsed since last application.

Crops	Time Interval in Months Before Replanting
Soybeans	anytime
Wheat, Barley, Oats, Rye	4
Field Corn *	10
Field Corn, IR (Resistant)**	8
Alfalfa	10
Clover	12
Sorghum	10
Tobacco (transplant)	10
Tomato (transplant)	10

All Other Crops require a successful Field Bioassay\*\*\*

\* The term "FIELD CORN" is defined to include only that corn grown for grain or silage, popcorn, and seed corn relative to the "Rotational Crop Guidelines" section of the label, but because seed corn inbred lines may vary in their sensitivity to trace amounts of herbicide carryover Du Pont cannot warrant that seed corn can be recropped without damage or yield loss. Users are advised to seek the advice of their seed corn company agronomist regarding inbred sensitivity to herbicides prior to planting any inbred lines.

- Field Corn (Resistant) indicates those field corn hybrids offered by Pioneer Hi-Bred International, Inc which carry the designation "IR" in the hybrid name such as 3180IR, 3343IR, 3377IR and others.
- Field Bioassay - The season before planting any crop not listed above, a successful field bioassay must be completed. The field bioassay will detect small quantities of "Lorox Plus" which can remain in the soil and injure rotational crops. A successful field bioassay means growing to maturity a test strip of the crop(s) intended for production the following year. The test strip should cross the whole field including knolls and low areas.

Combination Treatment: When recommended tank mix combinations are used, consult the product label for replanting and recropping instructions and observe the directions that are the most restrictive.

## SPRAYER CLEANUP

To avoid subsequent injury to desirable crops, thoroughly clean all mixing and spray equipment immediately following applications of "Lorox" Plus as follows:\*

1. Drain tank; thoroughly hose down the interior surfaces of the tank; then flush tank, boom, and hoses with clean water for a minimum of 5 minutes.
2. Partially fill the tank with water and add one of the cleaning agents listed below. Complete filling the tank with water, then flush the cleaning solution through the boom, hoses, and nozzles. Add water to completely fill the tank and allow to agitate or recirculate for at least 15 minutes. Again, flush the boom, hoses and nozzles, and drain the tank.
3. Repeat Step 2.
4. Remove the nozzles and screens and clean separately in a bucket containing water and the cleaning agent.
5. Thoroughly rinse the tank with clean water for a minimum of 5 minutes, flushing water through the boom and hoses.

NOTE: Use any of the following cleaning agents. Carefully read and follow the individual cleaning agent instructions.

1. One gallon of household ammonia (contains 3% active) per 100 gallons of water.
2. Nutra-Sol<sup>®</sup>
3. Loveland Tank and Equipment Cleaner<sup>®</sup>
4. Protank Cleaner<sup>®</sup>
5. Chem-Tank Cleaner and Neutralized<sup>®</sup>
6. Incide-Out<sup>®</sup>
7. Tank-Aid<sup>®</sup>

\*A steam cleaning of fiberglass or stainless steel aerial spray tanks is recommended prior to performing the above cleanout procedure to facilitate the removal of any caked deposits.

## PRECAUTIONS

- Do not apply "Lorox Plus" to soils with greater than pH 6.8, unless the following rotational crop is soybeans or a Du Pont recommended chlorimuron ethyl resistant corn variety. When using "Lorox Plus" maximum rotational crop flexibility occurs when the soil pH is at or below pH 6.8. However, soil pH may vary within a field (see "CAUTION" below.) Use of "Lorox Plus" on soils which exceed pH 6.8 may result in unacceptable injury to the following crop. "Lorox Plus" may be used on fields which are generally pH 6.8 or less, but which contain isolated areas where the pH exceeds 6.8 only if the following crop is soybeans or a Du Pont recommended chlorimuron ethyl resistant corn variety. For further information and a listing of these varieties, see Du Pont bulletin "Managing pH Hot Spots"

- CAUTION: Soil pH varies greatly, even within the same field. pH variations as much as 2 pH units are common. Composite soil samples taken across an entire field, such as those samples taken for soil fertility recommendations, may not detect areas of high pH (greater than pH 6.8). Sub-sampling areas likely to have pH values higher than the field average is recommended.

Soil pH may vary with soil type. Where different soil types are evident within a field, these types should be sampled separately.

Soil pH may vary due to conditions within a field. Such areas include, but are not limited to, areas bordered by limestone gravel roads, river bottoms subject to flooding, low areas in hardpan soils where evaporative ponds may occur, eroded hillsides, along drain tile lines, and areas where drainage ditch spoil has been spread. These areas should be sampled separately.

Soil pH may vary within the soil profile. For instance, fields in which lime has not been deeply incorporated may exhibit significantly higher pH values in the upper 3 inches of soil. Composite soil samples taken at a 6-8 inch depth may not reflect the elevated pH near the surface. In these cases shallow sampling, the upper 3 inches, is advised.

Determine soil pH by laboratory analysis using a 1:1 soil:water suspension.

- Do not graze treated fields or harvest for forage or hay.
- Use of "Lorox Plus" may affect rotational crops. Follow "ROTATIONAL CROP GUIDELINES."
- Do not use on sand, muck, or peat soils, nor on soils with less than 1/2% organic matter, as crop injury may occur.
- Do not apply "Lorox Plus" after the soybean crop has emerged.
- If "Scepter", "Pursuit" or any product containing the active ingredients, imazaquin or imazethapyr (such as "Squadron", "Partner") is applied the same year as "Lorox Plus", do not plant crops other than soybeans for at least 15 months from the last application. Crops listed in the "Lorox Plus' Rotational Crop Guidelines" may be planted after 15 months; all other crops require a successful field bioassay.
- Do not apply to land that has been or will be treated with "Glean", "Ally" or "Finesse" herbicides in the States of Nebraska, Kansas, North Dakota and South Dakota.

### **STORAGE AND DISPOSAL**

**Storage:** Store product in original container only. Do not contaminate water, other pesticides, fertilizer, food or feed in storage.

**Product Disposal:** Do not contaminate water, food or feed by storage or disposal. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

**Container Disposal:** Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

**NOTICE TO BUYER:** Purchase of this material does not confer any rights under patents of countries outside of the United States.

### **NOTICE OF WARRANTY**

Du Pont warrants that this product conforms to the chemical description on the label thereof and is reasonably fit for purposes stated on such label only when used in accordance with directions under normal use conditions. It is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness, or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of Du Pont. In no case shall Du Pont be liable for consequential, special or indirect damages resulting from the use or handling of this product. All such risks shall be assumed by the buyer. **DU PONT MAKES NO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE NOR ANY OTHER EXPRESS OR IMPLIED WARRANTY EXCEPT AS STATED ABOVE.**
