SUPPLEMENTAL LABELING

ACCENT® HERBICIDE
CROP ROTATION INTERVAL FOR PLANTING IRRIGATED POTATOES FOLLOWING IRRIGATED CORN TREATED WITH "ACCENT" HERBICIDE IN THE COLUMBIA BASIN OF WASHINGTON AND OREGON

ACCENT® HERBICIDE

EPA REG. NO. 352-560

CROP ROTATION INTERVAL FOR PLANTING IRRIGATED POTATOES FOLLOWING IRRIGATED CORN TREATED WITH "ACCENT" HERBICIDE IN THE COLUMBIA BASIN OF WASHINGTON AND OREGON

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Potatoes grown under sprinkler irrigation can be planted 10 months after using "accent" on sprinkler irrigated corn, providing the maximum use rate on corn does not exceed 1.0 ounce product per acre.

Corn treated with "Accent" must be grown to maturity and receive a minimum of 18 inches of irrigation water before potatoes can be planted at this rotation interval. Injury to potatoes may occur if less than 18 inches of irrigation is used on the previous corn crop.

NOTE

"Accent" should not be used in a tankmix or sequential application program with other ALS-inhibiting herbicides such as Exceed¹ or Beacon¹. The combined effects of these herbicides on the planting of subsequent crops have not been thoroughly investigated, and crop injury may occur.

IMPORTANT

BEFORE USING "ACCENT", READ AND FOLLOW ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS ON THE EPA-REGISTERED LABEL.

This bulletin contains new or supplemental instructions for use of this product which do not appear on the EPA-registered package label. Follow the instructions carefully.

This labeling must be in the possession of the user at the time of pesticide application.
