SUPPLEMENTAL LABELING

ACCENT® HERBICIDE
PLUS BEACON¹ AND CLARITY²
HERBICIDES
FOR WEED CONTROL IN CORN

ACCENT® HERBICIDE

EPA Reg. No. 352-560

ACCEPTED

JUL 22 1998

PLUS "BEACON" AND "CLARITY" HERBICIDES
FOR WEED CONTROL IN FIELD CORN

Under the Federal Insecticide,
Fungicide, and Rodenticide Act,
as amended, for the pesticide
registered under
EPA Reg. No. 352-560

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

DuPont ACCENT Herbicide may be tank mixed with "Beacon" and "Clarity" Herbicide for additional control of the following weeds when applied to field corn grown for grain.

WEED

| | |
|---------------|--------------------------|
| Velvetleaf | Eastern Black Nightshade |
| Cocklebur | Smartweed |
| Lambsquarters | Common Ragweed |
| Giant Ragweed | Jimsonweed |

Do not apply to field corn grown for seed, to popcorn or to sweet corn.

WHEN TO APPLY

Postemergence applications of ACCENT, "Beacon" and "Clarity" should be made to emerged field corn before the corn is 20" tall or is exhibiting 6 collars, whichever is the more restrictive. See the ACCENT label for sizes of grasses and other broadleaf weeds controlled.

HOW TO USE

Apply ACCENT plus "Beacon" and "Clarity" for additional annual broadleaf weed control as directed below.

| PRODUCT | RATE |
|-----------|--|
| ACCENT | .53-.66 ounces (1 soluble packet per 5 or 4 acres, respectively) |
| plus | |
| "Beacon" | .19 ounces (1 soluble packet per 8 acres) |
| plus | |
| "Clarity" | 2 fl. ounces per acre |

Use the lower rate of Accent for velvetleaf and common ragweed control. If other weeds are present, use the higher rate of Accent

Always add COC at 1% v/v (1 gal./100 gal. spray solution) and an ammonium nitrogen fertilizer such as 28-0-0 (2-4 qts/acre), 10-34-0 (1-2 qts/acre) or spray grade ammonium sulfate (21-0-0) at 2-4 lb/acre. The fertilizer must be added in addition to the crop oil concentrate.

ACCENT performs best when applied to young, actively growing grasses and weeds at the sizes listed on the label. Use a minimum of 15 gallons of water per acre (15 GPA) for best results.

IMPORTANT PRECAUTIONS

Refer to the ACCENT, "Beacon" and "Clarity" labels for additional use directions, restrictions, rotational crop intervals and precautions. The most restrictive provision on either label shall apply.

Do not apply ACCENT through any type of irrigation system.

IMPORTANT.

BEFORE USING ACCENT, READ AND FOLLOW ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS ON THE EPA-REGISTERED LABEL.

This bulletin contains new or supplemental instructions for use of this product which do not appear on the EPA-registered package label. Follow the instructions carefully.

This labeling must be in the possession of the user at the time of pesticide application.
