UPBEET® HERBICIDE
AERIAL APPLICATION USE ON
SUGARBEETS IN THE KLAMATH
BASIN OF CALIFORNIA

UPBEET® HERBICIDE

EPA Reg. No. 352-569

**AERIAL APPLICATION USE ON SUGARBEETS
IN THE KLAMATH BASIN OF CALIFORNIA**

DIRECTION FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

DuPont "Upbeet" herbicide may be applied by air for weed control in sugarbeets grown in Modoc and Siskiyou Counties of California in accordance with the restrictions described on this label. Consult the EPA approved "Upbeet" label for additional requirements, restrictions and precautions.

HOW TO USE

Before using "UpBeet" by air, be sure that the aircraft spray tank, and all mixing tanks and delivery system equipment is clean. Apply "UpBeet" at 1/2 to 1 ounces per acre. Add a non-ionic surfactant containing at least 80% active ingredient.

Apply in a minimum of 10 gallons of water per acre in California, when weeds are small and actively growing. Weeds which are sheltered from spray by sugarbeet foliage or other larger weeds may not be controlled. "UpBeet" can be tank mixed with other suitable sugarbeet herbicides registered for use by air. Consult the EPA registered "UpBeet" label for tank mix recommendations.

Read and follow all the label instructions and precautions for the other herbicide used in a tank mix with "UpBeet".

SPRAY DRIFT MANAGEMENT

The interaction of many equipment and weather-related factors determines the potential for spray drift. The applicator is responsible for considering all these factors when making application decisions.

AVOIDING SPRAY DRIFT IS THE RESPONSIBILITY OF THE APPLICATOR.

SPRAYER CLEANUP

Failure to adequately clean spray equipment used to mix and apply "Upbeet" before treating another crop can result in crop injury.

CROP INJURY THAT RESULTS FROM INADEQUATELY CLEANED SPRAY EQUIPMENT IS THE RESPONSIBILITY OF THE APPLICATOR. The spray equipment must be cleaned before "UPBEET" is sprayed. Follow the cleanup procedures specified on the labels of the previously applied products. If no directions are provided, follow the six steps outlined in After Spraying "UPBEET" in the EPA approved label. See the EPA-registered package label for Sprayer Cleanup and Spray Drift Management Directions.

IMPORTANT

BEFORE USING UPBEET, READ AND FOLLOW ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS ON THE EPA-REGISTERED LABEL.

This bulletin contains new or supplemental instructions for use of this product which do not appear on the EPA-registered package label. Follow the instructions carefully.

This labeling must be in the possession of the user at the time of pesticide application.
