## SUPPLEMENTAL LABELING

**DUPONT™ UPBEET® HERBICIDE  
FOR AERIAL APPLICATION TO  
SUGARBEETS IN THE IMPERIAL  
VALLEY OF CALIFORNIA**

### DUPONT™ UPBEET® HERBICIDE

EPA Reg. No. 352-569

## FOR AERIAL APPLICATION TO SUGARBEETS IN THE IMPERIAL VALLEY OF CALIFORNIA

### DIRECTIONS FOR USE

It is violation of federal law to use this product in a manner inconsistent with its labeling.

DuPont™ UPBEET® herbicide may be applied by air for weed control in sugarbeets grown in Imperial Valley of California, only by aerial applicators certified by DuPont to be in compliance with conditions of the "DuPont UPBEET® Aerial Stewardship Program".

UPBEET® herbicide may be applied by air for weed control in sugarbeets grown in Imperial Valley of California, in accordance with the restrictions described on the label. Consult the Section 3 Federal label for additional requirements, restrictions and precautions.

Before using UPBEET® herbicide by air, be sure that the aircraft spray tank, and all mixing tanks and delivery systems equipment is clean. Apply UPBEET® herbicide at 1/2 to 1 ounce per acre. Add a nonionic surfactant containing at least 80% active ingredient.

Apply in a minimum of 5 gallons of water per acre when weeds are small and actively growing. Weeds that are sheltered from spray by sugarbeet foliage or other larger weeds may not be controlled. UPBEET® can be tank mixed with other suitable sugarbeet herbicides registered for use by air. Consult the EPA registered UPBEET® label for tank mix recommendations.

### SPRAYER PREPARATION AND CLEANUP

It is important that spray equipment is cleaned and free of existing pesticide deposits before using UPBEET. Follow the cleanup procedures specified on the label of the product previously sprayed. If no cleanout procedure is provided, use the one that follows.

To avoid subsequent injury to other crops, thoroughly clean all mixing and spray equipment immediately following application of UPBEET®.

### CLEANUP PROCEDURE

1. Drain tank and thoroughly hose down the interior surfaces. Flush the tanks, boom, and hoses with water. Loosen and physically remove any visible deposits.
2. Partially fill the tank with clean water and one gallon household ammonia (contains 3% active ingredient) for every 100 gallons of water. Flush the hoses, boom and nozzles with the cleaning solution, then add more water to completely fill the tank. Circulate, with agitation, the cleaning solution through the tank and hoses for at least 15 minutes. Flush the hoses, boom and nozzles again with the cleaning solution and drain the tank.
3. Remove the nozzles and screens and clean separately in a bucket containing cleaning agent and water.
4. Repeat step 2.
5. Rinse tank, boom and hoses with clean water.
6. The rinsate may be disposed of on site or at an approved waste disposal facility.

**CROP INJURY THAT RESULTS FROM INADEQUATELY CLEANED SPRAY EQUIPMENT IS THE RESPONSIBILITY OF THE APPLICATOR.**

### SPRAY DRIFT MANAGEMENT

Avoid Spray drift to adjacent crops as injury may occur. The interaction of many equipment and weather-related factors determines the potential for spray drift. The applicator is responsible for considering all these factors when making application decisions.

Aerial applicators applying UPBEET® herbicide must position at least one person at the application site, with a wind indicator visible to the pilot of the aircraft, at all times during the application. In addition, the personnel at the application site must be able to communicate with the aircraft.

Crops which are sensitive to UPBEET® include, but are not limited to Lettuce (Head and Leaf varieties), Broccoli, Cauliflower, Cabbage, Onions, and seedling alfalfa. Applications to fields adjacent to these and all other crops must be made only under conditions which are not likely to result in drift off the treated site.

**AVOIDING SPRAY DRIFT IS THE RESPONSIBILITY OF THE APPLICATOR**

**IMPORTANT**  
**BEFORE USING THIS PRODUCT HERBICIDE, READ AND CAREFULLY NOTE THE CAUTIONARY STATEMENTS AND OTHER PROCEDURAL INFORMATION APPEARING ON THE EPA REGISTERED LABEL OR ON OTHER SUPPLEMENTAL LABELS.**

This label contains supplemental instructions for use of the referenced DuPont product which do not appear on the package label. Follow the instructions carefully.

This labeling must be in the possession of the user at the time of pesticide application.

*Read the Limitation of Warranty and Liability on the Section 3 Federal product label before buying or using THIS product. If terms are not acceptable, return the unopened package at once to Seller for full refund of purchase price paid. Otherwise, use by Buyer or any other User constitutes acceptance of the terms of the Limitation of Warranty and Liability on the Section 3 Federal product label.*
