TANK MIXES WITH REDUCED RATES OF PREEMERGENCE GRASS HERBICIDES FOR CRABGRASS CONTROL IN CORN

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

DuPont ACCENT or BASIS GOLD Herbicides may be used in a tank mix with reduced rates of preemergence grass herbicides for residual activity on later emerging grass flushes, including large crabgrass (Digitaria sanguinalis) and smooth crabgrass (Digitaria ischaemum).

ACCENT may be used in field corn, seed corn, and popcorn. Refer to the ACCENT label for use instructions in popcorn and seed corn. BASIS GOLD may be used in field corn grown for grain only.

ACCENT or BASIS GOLD may also be tank mixed with selected broadleaf products for additional broadleaf weed control.

WHEN TO APPLY

Tank mixes of ACCENT or BASIS GOLD plus one of the pre-emergence grass herbicides listed below may be broadcast to corn before the crop exceeds the heights listed below.

Table with 2 columns: Product, Maximum Corn Height. Lists products like Surpass EC Herbicide, Harness Herbicide, Dual II Herbicide, Dual II MAGNUM, Frontier 6.0 Herbicide, Prowl 3.3 EC Herbicide, and LeadOff Herbicide with their respective maximum corn heights.

Applications must be made before the crabgrass emerges (pre-emergence control only), and before the other grass weed

species exceed the sizes listed on the ACCENT or BASIS GOLD label. Refer to the ACCENT or BASIS GOLD label for a complete list of grasses controlled and the corn and weed sizes for application.

HOW TO USE

Rate

Apply a tank mix of ACCENT or BASIS GOLD plus a pre-emergence grass herbicide for postemergence control of the grasses listed on the ACCENT or BASIS GOLD label and residual control of large and smooth crabgrass as directed below:

ACCENT at a rate of 2/3 ounce per acre (1 soluble pack per 4 acres)

OR

BASIS GOLD at a rate of 14 ounces per acre (1 soluble pack per 4 acres)

plus -

Soil Type\*

Table with 4 columns: Soil Type, Coarse, Medium, Fine. Lists soil types like Surpass EC, Harness, Dual II, Dual II MAGNUM, Frontier 6.0, Prowl 3.3 EC, and LeadOff with their corresponding rates for coarse, medium, and fine soils.

\*Use the mid to lower end of the rate range for soils with less than 3% organic matter. Use the mid to upper end of the rate range for soils with 3% or more organic matter content.

2 2 4

- plus -

A crop oil concentrate at 1.0% v/v (1 gallon per 100 gallons of spray solution) or a nonionic surfactant at 0.25% v/v (1 quart per 100 gallons of spray solution). In addition, an ammonium nitrogen fertilizer such as 28-0-0 (2 quarts per acre), 10-34-0 (1 quart per acre), or ammonium sulfate (21-0-0 at 2 lb. per acre) is recommended to improve postemergence control.

Refer to the ACCENT or BASIS GOLD labels for further instructions on tank mixing for broadleaf weed control.

**IMPORTANT PRECAUTIONS**

Refer to the ACCENT or BASIS GOLD label for mixing and other use instructions.

*Preemergence herbicides rely on activation for control of grasses such as crabgrass that germinate or emerge after application.*

Precipitation or overhead sprinkler irrigation is required after application to move the preemergence grass herbicide into the weed germination zone to control unemerged weeds. The amount of precipitation or irrigation required depends on existing soil moisture, soil type, and percent organic matter content, but 1/4 to 3/4 inch is normally adequate. If weeds emerge after treatment, immediately rotary hoe or use a shallow cultivation to improve performance.

Refer to the ACCENT or BASIS GOLD and the respective pre-emergence herbicide labels for additional use directions, use restrictions, rotational crop intervals, and precautions. The most restrictive provision on either label shall apply.

Do not apply ACCENT or BASIS GOLD through any type of irrigation system.

**IMPORTANT**

**BEFORE USING "ACCENT" OR "BASIS GOLD " HERBICIDE, READ AND FOLLOW ALL APPLICABLE DIRECTIONS, RESTRICTIONS, AND PRECAUTIONS ON THE EPA-REGISTERED LABELS.**

This bulletin contains new or supplemental instructions for use of these products which does not appear on the EPA-registered package labels. Follow these instructions carefully.

**SUPPLEMENTAL LABELING**

**BASIS® GOLD™ HERBICIDE  
PLUS A REDUCED RATE OF ACCENT,  
HERBICIDE FOR IMPROVED GRASS  
CONTROL IN FIELD CORN**

**BASIS® GOLD™ HERBICIDE**

EPA REG. NO. 352-585

**PLUS A REDUCED RATE OF ACCENT® HERBICIDE  
FOR IMPROVED GRASS CONTROL IN FIELD CORN**

**DIRECTIONS FOR USE**

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

DuPont BASIS GOLD Herbicide may be used alone or tank mixed with a reduced rate of ACCENT Herbicide for additional control of the following weeds when applied to field corn grown for grain:

<u>WEED</u>	<u>MAXIMUM SIZE CONTROLLED</u>	
	<u>alone</u>	<u>BASIS GOLD plus 1/4 - 1/3 oz. ACCENT</u>
Woolly cupgrass	< 2"	4"
Wild proso millet	2"	4"
Fall panicum	3"	4"
Foxtail: bristly, giant, green, yellow	3"	4"
Sandbur, Field	2"	2"
Quackgrass	8"	8"

Do not apply to field corn grown for seed, to popcorn or to sweet corn.

**WHEN TO APPLY**

Postemergence applications of BASIS GOLD plus ACCENT should be made to emerged field corn before the corn is 12" tall or is exhibiting 6 collars, whichever is the more restrictive. See the BASIS GOLD label for sizes of other grasses and broadleaf weeds controlled.

**HOW TO USE**

Apply BASIS GOLD and a reduced rate of ACCENT for additional grass weed control as directed below:

<u>PRODUCT</u>	<u>RATE PER ACRE</u>
BASIS GOLD	14 ounces
plus	
ACCENT	1/4 - 1/3 ounces

BASIS GOLD plus ACCENT may be tank mixed with labeled broadleaf herbicides such as Homet(2), Tough(1), Banvel (1) or Clarity (1) for additional broadleaf weed control. Refer to the BASIS GOLD label and supplemental labels for a complete list of broadleaf tank mix herbicides, use rates and precautions.

BASIS GOLD performs best when applied to small, actively growing grasses, oftentimes 30-45 days after corn planting. Consult the BASIS GOLD label and supplemental labels for a complete listing of grasses controlled and the labeled sizes.

Do not apply less than 14 ounces of BASIS GOLD per acre. ACCENT applications in combination with and following a BASIS GOLD application may not exceed a total of 1 ounce per acre.

Always add a crop oil concentrate or methylated seed oil to BASIS GOLD at a rate of 1 gallon per 100 gallons of spray solution (1% v/v) unless specified otherwise on BASIS GOLD supplemental labels. In addition, add an ammonium nitrogen fertilizer such as 28-0-0 to the spray tank. See the BASIS GOLD label for additional information on crop oil concentrates and ammonium fertilizer types and rates. For best performance use a minimum of 15 gallons of water per acre (15 GPA) and follow the herbicide application with a cultivation 10-14 days later.

**IMPORTANT PRECAUTIONS**

An activating rainfall (>1/2") is required shortly after application for maximum BASIS GOLD residual activity.

Refer to the BASIS GOLD and ACCENT labels for additional use directions, restrictions, rotational crop intervals and precautions. The most restrictive provision on either label shall apply.

Do not apply BASIS GOLD through any type of irrigation system.

**IMPORTANT**

**BEFORE USING "BASIS GOLD" AND "ACCENT", READ AND FOLLOW ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS ON THE EPA-REGISTERED LABELS.**

This bulletin contains new or supplemental instructions for use of these products, which do not appear on the EPA-registered package labels. Follow these instructions carefully.
