**RESTRICTED USE PESTICIDE**

For retail sale to and use only by Certified Applicators or persons under their direct supervision and only for those uses covered by the Certified Applicator's certification.

This product is a restricted use herbicide due to ground and surface water concerns. Users must read and follow all precautionary statements and instructions for use on the container label in order to minimize potential for atrazine to reach ground and surface water.

#### **DIRECTIONS FOR USE**

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

DuPont BASIS® GOLD(TM) may be applied to field corn grown for grain to control certain weeds in southern states. BASIS® GOLD(TM) may be tank mixed with atrazine for improved control of certain weeds. Before applying BASIS® GOLD(TM), ensure it is compatible with any insecticide applied to corn. After applying BASIS® GOLD(TM), peanuts may be planted the following year. See directions for use below for detailed instructions.

#### **TANK MIXES**

In addition to currently registered tank mix partners, atrazine may be tank mixed with BASIS® GOLD(TM). Add 1/2-1 pint of atrazine (4lb/gal, or equivalent rate of other formulations) to improve control of sicklepod and Florida pusley. Always include crop oil concentrate at a rate of 1% V/V ( 1 gallon per 100 gallons of spray solution) when making application to emerged weeds.

#### **WEEDS CONTROLLED**

In addition to the weeds listed on the federal label, BASIS® GOLD(TM) will control the following weeds when applied at 14 oz per acre. Refer to the federal label for information on adjuvants, mixing and application. Do not apply more than 14 oz per acre per season.

Sicklepod	1-2 inches**
Prickly sida	1-2 inches
Wild radish	6-12 inches
Cutleaf evening primrose	4-6 inches
Florida pusley	1-2 inches**

\*\*For best results add 1/2-1 pt atrazine.

#### **CROP ROTATION**

In addition to the rotational crops listed on the federal label, peanuts may be planted the spring following a BASIS® GOLD(TM) application.

For tank mixes or sequential applications, follow the most restrictive provisions of the other products applied.

#### **ENVIRONMENTAL CONDITIONS**

Injury may be severe when BASIS® GOLD(TM) is applied under conditions of stress to corn plants, such as cold soil or air temperatures (under 50° F), water-saturated soils or stress from other factors. Wait for growing conditions to improve before applying BASIS® GOLD(TM). Refer to the EPA-registered label for additional information.

**SOIL INSECTICIDE INTERACTION INFORMATION**

Before using BASIS® GOLD, ensure that it is compatible with any insecticides previously applied to the corn crop.

### **ADDITIONAL INSTRUCTIONS FOR USE OF BASIS® GOLD(TM) IN CERTAIN SOUTHERN STATES (AL, GA, NC, SC)**

#### **DIRECTIONS FOR USE**

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

DuPont BASIS® GOLD(TM) may be applied to field corn grown for grain to control certain weeds in southern states. BASIS® GOLD(TM) may be tank mixed with atrazine for improved control of certain weeds. Before applying BASIS® GOLD(TM), ensure it is compatible with any insecticide applied to corn. After applying BASIS® GOLD(TM), peanuts may be planted the following year. See directions for use below for detailed instructions.

#### **TANK MIXES**

In addition to currently registered tank mix partners, atrazine may be tank mixed with BASIS® GOLD(TM). Add 1/2-1 pint of atrazine (4lb/gal, or equivalent rate of other formulations) to improve control of sicklepod and Florida pusley. Always include crop oil concentrate at a rate of 1% V/V ( 1 gallon per 100 gallons of spray solution) when making application to emerged weeds.

#### **WEEDS CONTROLLED**

In addition to the weeds listed on the federal label, BASIS® GOLD(TM) will control the following weeds when applied at 14 oz per acre. Refer to the federal label for information on adjuvants, mixing and application. Do not apply more than 14 oz per acre per season.

<u>Weed</u>	<u>Height at application</u>
Sicklepod	1-2 inches**
Prickly sida	1-2 inches
Wild radish	6-12 inches
Cutleaf evening primrose	4-6 inches
Florida pusley	1-2 inches**

\*\*For best results add 1/2-1 pt atrazine.

#### **CROP ROTATION**

In addition to the rotational crops listed on the federal label, peanuts may be planted the spring following a BASIS® GOLD(TM) application.

For tank mixes or sequential applications, follow the most restrictive provisions of the other products applied.

#### **ENVIRONMENTAL CONDITIONS**

Injury may be severe when BASIS® GOLD(TM) is applied under conditions of stress to corn plants, such as cold soil or air temperatures (under 50° F), water-saturated soils or stress from other factors. Wait for growing conditions to improve before applying BASIS® GOLD(TM). Refer to the EPA-registered label for additional information.

#### **IMPORTANT PRECAUTIONS**

Do not apply BASIS® GOLD(TM) to corn plants taller than 12 inches or exhibiting 6 collars, whichever is more restrictive. Do not apply BASIS® GOLD(TM) through any type of irrigation system.
