DUPONT™ BASIS® GOLD TANK MIXTURES WITH CALLISTO¹ HERBICIDE

"..... A Growing Partnership With Nature"

DUPONT™ BASIS® GOLD HERBICIDE

EPA Reg. No. 352-585

TANK MIXTURES WITH CALLISTO HERBICIDE FOR WEED CONTROL IN CORN

DIRECTIONS FOR USE

DuPont™ BASIS® GOLD Herbicide may be tank mixed with 1.0-3.0 oz of Callisto Herbicide for weed control in corn. Apply 14 ounces of BASIS® GOLD per acre plus at least the rate of Callisto indicated in the table below, for the control of weeds listed on the BASIS® GOLD label plus broadleaf weeds as noted:

Table with columns: Species, Maximum Weed Height (Inches), Callisto rate per acre (1.0 oz, 1.5 oz, 2.0 oz, 3.0 oz). Lists weeds like Cocklebur, Jimsonweed, Lambquarters, etc.

* may provide better control of larger weeds or when applications are made under more difficult growing conditions

WHEN TO APPLY

Postemergence applications of BASIS® GOLD + Callisto may be broadcast to corn up to 12" tall, up to and including 5 leaf collars (V5), whichever is more restrictive. See the BASIS® GOLD label for a list of grasses controlled and sizes for application, as well as additional broadleaf weeds controlled.

HOW TO USE

Apply 14 ounces of BASIS® GOLD in combination with rates of Callisto listed above for the control of grasses and broadleaf weeds. BASIS® GOLD performs best when applied to young, actively growing grasses and broadleaf weeds. Use a minimum of 15 gallons of water per acre (15 GPA) for best results.

SPRAY ADDITIVES

Add an ammonium nitrogen fertilizer such as 28-0-0 (2-4 qts/acre), 10-34-0 (1-2 qts/acre), or spray grade ammonium sulfate (21-0-0) at 2-4 lbs/acre plus a petroleum-based crop oil concentrate (COC) at 1%v/v (1 gal/100 gal spray solution).

IMPORTANT PRECAUTIONS

Refer to the BASIS® GOLD and Callisto labels for additional use directions, restrictions, rotational crop intervals, and precautions. Except for the tank mixture use rates on this supplemental label, the most restrictive provision on either label shall apply. Do not apply BASIS® GOLD through any type of irrigation system.

IMPORTANT

BEFORE USING THESE PRODUCTS, READ AND FOLLOW ALL APPLICABLE DIRECTIONS, RESTRICTIONS, AND PRECAUTIONS ON THE EPA-REGISTERED LABELS.

This label contains supplemental instructions for use of this product and may contain recommendations which are not appropriate for all geographies and weed control situations. Consult local DuPont fact sheets, technical bulletins, and service policies prior to following the recommendations on this label.

This label must be in the possession of the user at the time of pesticide application.
