Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product when the Agency requires all registrants of similar products to submit such data.
2. Limit the number of bait stations per retail package to nine bait stations.
3. Make the following label changes before you release the product for shipment:
 - a. Revise the EPA Registration Number to read, "EPA Reg. No. 352-664."
 - b. Indicate that the product is "For control of ants (excluding fire ants, harvester ants, carpenter ants, and pharaoh ants)." This statement is needed because no efficacy data were submitted to support the claim that the use of the product results in complete colony control of fire ants, harvester ants, carpenter ants, or pharaoh ants.

Signature of Approving Official:

John Hebert, Product Manager (07)
Insecticide-Rodenticide Branch, Registration Division (7505C)

Date:

August 12, 2005

4. Submit one copy of the revised final printed label for the record before you release the product for shipment.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label and the 6/1/05 efficacy review are enclosed for your records. If you have any questions please contact Ann Hanger at (703) 306-0395 or hanger.ann@epa.gov

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

GENERAL INFORMATION

DuPont™ ADVION™ ant bait stations contain bait material with the active ingredient indoxacarb, an insecticide that acts through ingestion by ants. The activity of this insecticide allows adequate consumption of the bait by ants prior to onset of mortality. This provides enough time for foraging ants to return to nest sites and contaminate other colony members including larvae and queens. This action results in complete control of the ant colony.

Space sprays or other residual materials should not be applied directly to or near the bait stations. Application of these materials can cause ants to behave abnormally and therefore reduce the potential of feeding on the bait material inside the station. Foraging ants must be able to feed on the bait and return to the colony.

ADVION™ ant bait stations should be placed in areas where ants are currently foraging or foraging activity is suspected. The ant bait stations should be placed adjacent to active foraging trails when possible. Care should be exercised in order to reduce the disturbance to the natural foraging pattern. If placed along foraging trails properly, ants should detect and begin feeding at the bait station within approximately 30 minutes. An increase in foraging activity around the station indicates good recruitment.

In child resistant packaging. Still use care when placing ant bait stations, especially in or around homes or residential buildings.

Indoor Use:

1. Thoroughly inspect infested area to determine proper placement of ADVION™ ant bait stations.
2. Placement of 1-4 ant bait stations where ants are observed is adequate to control normal ant infestations. Heavy infestations or infestations that are difficult to access or heavier infestations in larger areas may require application of additional ADVION™ ant bait stations.
3. ADVION™ ant bait stations may be placed on vertical surfaces by using the adhesive on the bottom of the station. Additional adhesive can be applied if necessary.
4. In addition to being placed directly along foraging trails, place ADVION™ ant bait stations along walls, under appliances or industrial equipment, inside garbage containers, inside cabinets, under furniture, or any locations where there is ant activity or ants can potentially gain entry into a building or structure.

5. Do not place stations on food preparation surfaces.
6. Inspect the ADVION™ ant bait stations periodically and replace as needed or every 2 to 3 months.

Outdoor Use:

1. Thoroughly inspect infested area to determine proper Advion Ant Bait Station Placement. Pay close attention to areas where ants may gain access to a building or structure
2. Apply Advion Ant Bait stations on or near building/structure exterior areas where ants are actively foraging such as near tree bases, along exterior walls, around garbage-collection areas, utility accesses, windows, vents, or along the ground next to structures.
3. ADVION™ ant bait stations can be placed on vertical surfaces by using the adhesive on the bottom of the station. Additional adhesive can be applied if necessary.
4. Placement of 1-4 ant bait stations where ants are observed is adequate to control normal ant infestations. Heavy infestations or infestations that are difficult to access or heavier infestations in larger areas may require application of additional ADVION™ ant bait stations.
5. Inspect the ADVION™ ant bait stations periodically and replace as needed or every 2 to 3 months.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.
