DuPont Linuron Technical
EPA Reg. No. 352-679
Application Dated May 19, 2009

Dear Mr. Ambrose:

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, is acceptable, provided you make the following changes:

1. Change the heading from "Inert Ingredients" to "Other Ingredients".
2. Move the statement "Do not contaminate water, food, or feed by storage **and** disposal" from the Pesticide Disposal section to directly below the Storage and Disposal heading.
3. Revise the Pesticide Disposal statement to read "Wastes resulting from the use of this product **must** be disposed of on site or at an approved waste disposal facility."
4. Revise the Container Handling instructions for Nonrefillable Plastic and Metal Containers in IBC by replacing the text in bold:

Nonrefillable container. Do not reuse or refill this container. **Clean container promptly after emptying. To clean the container before final disposal, empty the remaining contents from this container into application equipment or a mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate water with the pump for 2 minutes. Pour or pump rinsate into application equipment or rinsate collection system. Repeat this rinsing procedure two more times.** Then, (a) for Plastic Containers, offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration, or, if allowed by state and local authorities, by burning; if burned, stay out of smoke, or (b) for Metal Containers, offer for recycling if available or reconditioning if appropriate or puncture and dispose of in a sanitary landfill, or by other procedures approved by the state and local authorities."
