Subject: Amendment to Add a Supplemental Label – add bolt technology soybeans
Product Name: DuPont Ally Extra SG Herbicide (With Totalsol Soluble
Granules)
EPA Registration Number: 352-715
Application Date: 4-6-16
Decision Number: 515925

Dear Mr. Bockrath:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. This approval is only for a supplemental label that is an addendum to the master label. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

This supplemental labeling contains some new and/or revised uses and/or directions which may be additional to the uses and/or directions found on the label on or attached to the container, but this supplemental labeling does not by itself constitute the complete set of use directions. The complete set of use directions is set forth on the container label as combined with this supplemental labeling.

A stamped copy of your labeling is enclosed for your records. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling.

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, please contact Erik Kraft by phone at 703-308-9358, or via email at kraft.erik@epa.gov.

SUPPLEMENTAL LABELING

**DUPONT™ ALLY® EXTRA SG
HERBICIDE**

**ROTATION INTERVAL TO SOYBEANS WITH
BOLT™ TECHNOLOGY**

**DUPONT™ ALLY® EXTRA SG HERBICIDE
(WITH TOTALSOL® SOLUBLE GRANULES)**

EPA REG. NO. 352-715

ROTATION INTERVAL TO SOYBEANS WITH BOLT™ TECHNOLOGY

This supplemental label expires on March 9, 2019 and must not be used or distributed after this date.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

CROP ROTATION

Minimum Rotation Intervals

Minimum rotation intervals* are determined by the rate of breakdown of ALLY® EXTRA SG applied. ALLY® EXTRA SG breakdown in the soil is affected by soil pH, presence of soil microorganisms, soil temperature, and soil moisture. Low soil pH, high soil temperature, and high soil moisture increase ALLY® EXTRA SG breakdown in soil, while high soil pH, low soil temperature, and low soil moisture slow ALLY® EXTRA SG breakdown.

Of these 3 factors, only soil pH remains relatively constant. Soil temperature, and to a greater extent, soil moisture, can vary significantly from year to year and from area to area. For this reason, soil temperatures and soil moisture should be monitored regularly when considering crop rotations.

*The minimum rotation interval represents the period of time from the last application to the anticipated date of the next planting. **Minimum rotation intervals must be extended 1 crop season if drought conditions prevail after application and before the rotational crop is planted.**

Soil pH Limitations

ALLY® EXTRA SG should not be used on soils having a pH above 7.9, because extended soil residual activity could extend crop rotation intervals beyond normal. Under certain conditions, ALLY® EXTRA SG could remain in the soil for 34 months or more, injuring wheat, barley or triticale. In addition, other crops planted in high-pH soils can be extremely sensitive to low concentrations of ALLY® EXTRA SG.

Checking Soil pH

Before using ALLY® EXTRA SG, determine the soil pH of the areas of intended use. To obtain a representative pH value for the test area, take several 0" to 4" samples from different areas of the field and analyze them separately. Consult local extension publications for additional information on recommended soil sampling procedures.

ROTATION INTERVALS IN NON-IRRIGATED LAND FOLLOWING USE OF ALLY EXTRA SG HERBICIDE ON WHEAT, BARLEY, TRITICALE OR FALLOW

States	Crop	Soil pH	Application Rate (oz/A)	Minimum Rotation Interval* (months)
Colorado Kansas Nebraska Oklahoma Texas	Soybeans with the BOLT™ technology	7.9 or lower	0.3 to 0.5	4
