For retail sale to and use only by Certified Applicators, or persons under their direct supervision, and only for those uses covered by the Certified Applicator's certification.

DUPONT™ BREAKFREE™ ATZ HERBICIDE

EPA Reg. No. 352-724

**ROTATIONAL CROP RESTRICTIONS
AFTER FINAL APPLICATION**

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This label must be in the possession of the user at the time of pesticide application.
- Read the label affixed to the container for BREAKFREE™ ATZ herbicide before applying. Follow all applicable use directions and precautions on the EPA-registered label.
- Use of BREAKFREE™ ATZ according to this supplemental labeling is subject to all restrictions and limitations imposed by the label affixed to the product container.

DIRECTIONS FOR USE

Refer to product label for General Use Precautions, Mixing and Application instructions.

Rotational Crop Restrictions

When tank mixing with other herbicides, follow the most restrictive crop rotation guidelines on the label of each product used. The following rotational crops may be planted as indicated:

| Crop | Interval |
|---|--------------------------------------|
| Corn (1) | Anytime - 0 Months After Application |
| Sorghum, Soybean (2) | Spring Following Application |
| Alfalfa, Barley, Dry beans (3), Lupin (4), Millet, pearl or proso, Oats, Pea (6), Potatoes, Rye, Sugar beets, Sunflower, Tobacco (7), Triticale, Wheat, Wild rice | 15 Months After Application (5) |

Numbers within parentheses (-) in the table refer to Specific Rotational Crop Requirements or crop descriptions below.

- (1) If crop treated with BREAKFREE™ ATZ is lost, corn may be replanted immediately. Do not make a second application of BREAKFREE™ ATZ. Do not apply BREAKFREE™ ATZ after June 10, unless only corn will be planted the following year.
- (2) Due to the risk of atrazine carryover, injury to soybeans may occur the year following corn when planted in north central and north west Iowa, south central and southwest Minnesota, northern Nebraska and southeast South Dakota on soils having a calcareous surface layer and relatively high pH.
- (3) Dry beans includes: adzuki, kidney, lima, navy, pinto
- (4) Lupin includes: grain, white, white sweet
- (5) Approved rotation crops list does not include any species of succulent beans and peas.
- (6) Pea includes: blackeyed, chick, cow, Crowder, field, pigeon, Southern
- (7) Because of atrazine carryover, injury may occur to tobacco.

DUPONT™ BREAKFREE™ ATZ HERBICIDE

EPA Reg. No. 352-724

WEED CONTROL IN SWEET CORN

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This label must be in the possession of the user at the time of pesticide application.
- Read the label affixed to the container for BREAKFREE™ ATZ herbicide before applying. Follow all applicable use directions and precautions on the EPA-registered label.
- Use of BREAKFREE™ ATZ according to this supplemental labeling is subject to all restrictions and limitations imposed by the label affixed to the product container.

DIRECTIONS FOR USE

BREAKFREE™ ATZ Herbicide Applied Alone

Used alone, BREAKFREE™ ATZ herbicide may be applied to sweet corn using rates recommended in the product label for BREAKFREE™ ATZ and application methods and timing listed below.

Carriers and Spray Volume: Either water or liquid fertilizers such as solutions, slurries or suspensions may be used as liquid carriers. Refer to product label for BREAKFREE™ ATZ for details.

Application Timing and Methods: For the optimum period of effective weed control during the time most critical to corn production, preplant applications of BREAKFREE™ ATZ should occur as close as possible to planting. Preemergence applications should occur as close as possible to planting, but prior to weed emergence. Refer to product label for BREAKFREE™ ATZ for details.

Note: Do not apply BREAKFREE™ ATZ to sweet corn as an early postemergence application.

- **Early Preplant:** On medium and fine textured soils (see Table 1 in main label), BREAKFREE™ ATZ may be applied up to 30 days prior to planting.
- **Preplant Incorporation:** BREAKFREE™ ATZ and certain tank mixes may be mechanically incorporated in the top 2 inches of the soil with field cultivators, discs, or spring tooth harrows at any time within 14 days prior to planting.
- **Preemergence Surface:** BREAKFREE™ ATZ and certain tank mixes may be applied to the soil surface as a broadcast or banded application.
- **Postplant-Preemergence:** BREAKFREE™ ATZ may be applied immediately after planting but prior to corn emergence.
- **Banding Preemergence:** BREAKFREE™ ATZ may be applied in a 10 to 14 inch band after corn planting but prior to corn emergence.

Sprinkler Irrigation: Do not apply BREAKFREE™ ATZ by sprinkler irrigation. Use a sprinkler system only to incorporate BREAKFREE™ ATZ after application. Refer to product label for BREAKFREE™ ATZ for details.

Cultivation: Cultivation should be delayed as long as possible. If weeds develop, a shallow cultivation or rotary hoeing will generally result in improved weed control. Refer to product label for BREAKFREE™ ATZ for details.
