Subject: Adding Optional Marketing "Claim Rethink Pest Control"

Dear Ms. Davis-Cannon:

The Agency is in receipt of your Application(s) for Pesticide Notification under Pesticide Registration Notice (PRN) 2007-4 dated July 27, 2009 for:

EPA Registration 352-776

DuPont Aperia Insecticide (alt name "Arilon Insecticide")

The Registration Division (RD) has conducted a review of this request for applicability under PRN 2007-4 and finds that the label change(s) requested falls within the scope of PRN-2007-4. The label has been date-stamped "Notification" and will be placed in our records.

If you have any questions, at 703 305-5409 or electronically at daniel.dani@epa.gov

Sincerely,

A handwritten signature in black ink, appearing to be "Dani Daniel".

Dani Daniel
Registration Division (7505P)

**RE: DuPont™ Aperion™ Insecticide (Primary Brand Name)
DuPont™ Arilon™ Insecticide (Alternate Brand Name)
EPA Reg. No. 352-776
Addition of Optional Marketing Claim for Individual Sticker**

Dear Mr. Hebert:

As recommended in your response sent electronically on July 10, 2009 in regards to our question about distribution of a sticker with the subject product, E.I. du Pont de Nemours and Company (DuPont) hereby submits an application using the Notification option for the following action:

- Page 5: Added optional marketing claim to allow distribution of individual sticker with the following statement:

*RETHINK PEST CONTROL
DuPont Arilon™ Insecticide*

Enclosed are the following documents to support this Notification:

- EPA Registration Application form 8570-1
- Three (3) copies of the revised DuPont Aperion™ Insecticide master label
- One copy of the sticker graphics
- Notification statement

If you have any questions concerning this Notification, please contact me at 302-366-6074 or at tamika.n.davis-cannon@usa.dupont.com.

Sincerely,

Tamika N. Davis - Cannon

NOTIFICATION

ATG 13 200

DuPont™ Aperion™

INSECTICIDE

Professional Products

INTENDED FOR USE BY COMMERCIAL APPLICATORS OR PEST MANAGEMENT PROFESSIONALS ONLY

For use in single and multi-family residential buildings, schools, institutional, commercial and industrial facilities (including warehouses, apartments, supermarkets, restaurants, motels, hotels, hospitals, daycares, and food handling/storage/processing establishments) and transportation equipment such as aircraft, trains, ships, boats and buses.

This product will kill workers and/or winged reproductive forms of termites present at the time of application only. Application of this product will not provide structural protection nor substitute for mechanical alteration, soil or foundation treatment with termiticide. This product is not to be used as sole protection against termites, as it is not designed to offer structural protection and will not prevent future infestations. A professional inspection is recommended.

<i>Active Ingredient</i>	<i>By Weight</i>
Indoxacarb*	
(S)-methyl 7-chloro-2,5-dihydro-2-[[methoxy-carbonyl][4(trifluoromethoxy)phenyl]amino]-carbonyl]indeno[1,2-e][1,3,4]oxadiazine-4a-(3H)-carboxylate	20.0%
<i>Other ingredients</i>	80.0%

**KEEP OUT OF REACH OF CHILDREN
CAUTION**

FIRST AID

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or a doctor. Do not give anything by mouth to an unconscious person.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Remove contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-441-3637 for emergency medical treatment information.

For information on the use of this product call DuPont Professional Products at 1-888-6-DUPONT (1-888-638-7668).

The miracles of science

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. Causes moderate eye irritation. Harmful if absorbed through skin. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling. Harmful if inhaled. Avoid breathing (dust, vapor or spray mist). Remove contaminated clothing and wash clothing before reuse.

PERSONAL PROTECTIVE EQUIPMENT

All pesticide handlers (mixers, loaders and applicators) must wear:

- Shirt and long pants
- Water-proof gloves
- Shoes plus socks

Follow manufacturer's instructions for cleaning/maintaining personal protective equipment (PPE). If no such instructions for washables are available, use detergent and hot water. Keep and wash PPE separately from other laundry.

USER SAFETY RECOMMENDATIONS

USER SHOULD: Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and aquatic invertebrates. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment rinsewater. Do not apply where/when conditions could favor runoff. Runoff from treated areas may be hazardous to aquatic organisms in neighboring areas.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Read entire label before using this product.

- Not for use on plants being grown for sale or other commercial use, or for commercial seed production.
- Do not formulate this product into other end-use products without written permission of DuPont Professional Products
- Do not apply this product through any type of irrigation system.
- Do not apply this product in commercial nurseries and greenhouses or on sod farms.
- Keep people and pets away from treated areas until treatment has dried.
- Do not apply a broadcast or general surface application to interior surfaces of residential or commercial structures.

PRODUCT INFORMATION

DuPont™ APERION™ insecticide is a water dispersible granule concentrate which contains the non-repellent active ingredient Indoxacarb. When applied following label directions APERION™ insecticide is effective at controlling a wide range of insect pests common in urban environments.

APERION™ insecticide forms a suspension for making applications. APERION™ is formulated to not stain or cause damage to most building surfaces where water applied alone causes no damage. It is still recommended that before a first application is made, treat a small area and allow to dry to determine whether staining will occur.

APPLICATION MIXING DIRECTIONS

Equipment Cleaning:

Prior to application, start with clean, well maintained application equipment. Immediately following application, thoroughly clean all application equipment to reduce the risk of forming hardened deposits that might become difficult to remove. Drain application equipment. Thoroughly rinse application equipment and flush hoses and nozzles with clean water. Clean all other associated application equipment. Take all necessary safety precautions when cleaning equipment. Do not clean equipment near wells, water sources or desirable vegetation. Dispose of waste rinse water in accordance with local regulations.

[Option 1: The following mixing directions are for APERION™ insecticide in nonrefillable plastic containers]

Dilution Chart for APERION™ Insecticide:

Volume of Water to Use	Desired End Use Application Rate	Quantity of APERION™ (Dry Oz.) insecticide needed
1.0	0.05%	0.33 oz.
	0.10%	0.66 oz.
3.0	0.05%	1.0 oz.
	0.10%	2.0 oz.
5.0	0.05%	1.7 oz.
	0.10%	3.3 oz.
25.0	0.05%	8.25 oz.
	0.10%	16.5 oz.
50.0	0.05%	16.5 oz.
	0.10%	33.0 oz.

[Option 2: The following mixing directions are for APERION™ Insecticide in nonrefillable small plastic bags/packets]

Dilution Chart for APERION™ Insecticide:

Volume (gals.) of Water to Use	Desired End Use Application Rate	Quantity of APERION™ (Dry Oz.) insecticide needed
1.0	0.05%	0.33 oz. (1 packet*)
	0.10%	0.66 oz. (2 packets)
3.0	0.05%	1.0 oz. (3 packets)
	0.10%	2.0 oz. (6 packets)
5.0	0.05%	1.7 oz. (5 packets)
	0.10%	3.3 oz. (10 packets)

* One (1) packet contains 0.33 oz (approximately 9.4 g) of APERION™ insecticide

Steps When Mixing:

IMPORTANT: Do Not pour DuPont™ APERION™ insecticide into an empty tank.

[Each packet contains 0.33 ounces of APERION™ insecticide concentrate and must first be opened then the contents are poured into the application or mixing tank.] [optional]

1. Application tank to be used with APERION™ should be cleaned of any product used.
2. Application tank should be filled with water to about half of desired volume.
3. Appropriate amount of APERION™ is now poured into tank.
4. Agitate.
5. Fill tank with remaining half volume of water and agitate again.
6. Now ready to apply. If treatment mixture sits in the tank for extended periods, re-agitate prior to application.

APPLICATION VOLUMES

For low to medium infestations or for routine maintenance applications apply a volume of approximately 1 gal. of treatment solution per 1,000 square feet. This application volume is applied approximately to run-off. In order to achieve greater coverage, apply 2 to 4 gals. per 1,000 square feet. Such conditions would include medium to heavy infestations of pests, porous surfaces, complex sites such as thick, heavy perimeter shrubbery, or for maximum residual performance.

APPLICATION DIRECTIONS: PESTS

Cockroaches

APERION™ insecticide is effective at controlling cockroaches. Apply using a treatment solution containing 0.05% - 0.1% indoxacarb in water (refer to APERION™ insecticide dilution chart). For heavy infestations of cockroaches and/or extreme environmental conditions, use the higher rate.

Indoors: Apply APERION™ insecticide using a coarse, low pressure water-based spot or crack and crevice treatment that targets areas of cockroach infestation or areas known or suspected to be cockroach harborage sites. Direct applications can be made to areas including, but not limited to, pest entry sites, attics, wall voids, behind cabinets or equipment, under counters or appliances, along baseboards and reticulation systems.

Outdoors: Apply APERION™ insecticide using a coarse, low pressure spray as a spot, crack and crevice, general surface or perimeter band-type treatment to control or prevent cockroach infestations. A perimeter band of 10 ft., for example, can include 3 ft. up the exterior wall and out to 7 ft. of horizontal substrate away from the wall base. Treat heavier infestations or more complex substrates such as stone or brick with greater volumes of treatment solution. Refer to volume directions earlier in this label for more information. In addition to exterior structural elements, outdoor breeding sites such as refuse collection areas, loading docks, adjacent tree holes, crawl spaces, or other sources of cockroach infestations should be located and receive a treatment.

Ants (Excluding Fire and Harvester Ants)

APERION™ insecticide is effective at controlling ants (excluding fire and harvester ants). Apply using a treatment solution containing 0.05% - 0.1% indoxacarb in water (refer to APERION™ insecticide dilution chart). For heavy infestations of ants (excluding fire and harvester ants) and/or extreme environmental conditions use the higher application rate.

Indoors: Apply APERION™ insecticide using a coarse low pressure spray as a spot or crack and crevice treatment that targets active ant trails, nests, or other infested areas or areas suspected to be infested. Also make direct applications to areas including, but not limited to, pest entry sites, attics, wall voids, behind cabinets or equipment, under counters or appliances, along baseboards and reticulation systems.

Outdoors: Apply APERION™ insecticide using a coarse, low pressure spray as a spot, crack and crevice, general surface or perimeter band-type treatment to control or prevent ant infestations. A perimeter band of 10 ft., for example, can include 3 ft. up the exterior wall and out to 7 ft. of horizontal substrate away from the wall base. Treat heavier infestations or more complex substrates such as stone or brick with greater volumes of treatment solution. Refer to volume directions earlier in this label for more information. In addition to exterior structural elements, outdoor nesting sites such as refuse collection areas, flower/mulch beds, adjacent tree holes, surrounding turf areas, crawl spaces, or other nest/foraging sites, and foraging trails can be treated. Treat ant nests or mounds directly using 1-2 gals. of treatment dilution per mound. Surfaces commonly used by ants for foraging such as outdoor edges/frames of windows, doors, utility penetrations, roof lines eaves, and other structural edges can also be treated.

Nuisance Pests: Crickets, Pillbugs and Sowbugs

APERION™ insecticide is effective at controlling crickets, pillbugs and sowbugs. Apply using a treatment solution containing 0.05% - 0.1% indoxacarb in water (refer to dilution chart). For heavy infestations and/or extreme environmental conditions, use the higher rate.

Indoors: Apply APERION™ insecticide using a coarse low pressure spray as a spot or crack and crevice treatment that targets infested areas or areas suspected to be infested. Direct applications can be made to areas including, but not limited to, pest entry sites, attics, wall voids, behind cabinets or equipment, under counters or appliances, along baseboards, storage rooms, garage areas, basements and reticulation systems.

Outdoors: Apply APERION™ insecticide using a coarse, low pressure spray as a spot, crack and crevice, general surface or perimeter band-type treatment to control crickets, pillbugs and sowbugs and to help prevent these nuisance pests from invading the structure. A perimeter band of 10 ft., for example, can include 3 ft. up the exterior wall and out to 7 ft. of horizontal substrate away from the wall base. Treat heavier infestations or more complex substrates such as stone or brick with greater volumes of treatment solution. Refer to volume directions earlier in this label for more information.

Termites

DuPont™ APERION™ insecticide will kill subterranean termite species of Coptotermes, Heterotermes, Reticulitermes, and Zootermopses. This product will kill workers and/or winged reproductive forms of termites present at the time of application only. Application of this product will not provide structural protection nor substitute for mechanical alteration, soil or foundation treatment with termiticide. This product is not to be used as sole protection against termites, as it is not designed to offer structural protection and will not prevent future infestations, A professional inspection is recommended.

APERION™ can be applied as a spot treatment to kill active termites by applying as a coarse liquid spray at 1 gal. per 10 sq. ft. of infested area. Treat infested sites directly. Apply using a treatment solution containing 0.05% - 0.1% indoxacarb in water(refer to APERION™ insecticide dilution chart). For heavy infestations of termites and/or extreme environmental conditions, use the higher rate.

Food Handling Establishments

(Food handling establishments are places other than private residences in which food is held, processed, prepared or served.)

Applications in Nonfood Areas: APERION™ Insecticide may be used as a spot or crack and crevice treatment to control cockroaches in residential structures and the non-food areas of commercial, industrial, public and institutional buildings/structures, including restaurants, warehouses, food processing plants, supermarkets, hospitals, nursing homes, motels, hotels, schools, daycares, laboratories, computer facilities, aircraft, buses, boats/ships, trains, pet shops and zoos.

Nonfood/non-feed areas include areas such as garbage rooms, lavatories, floor drains (to sewers), entries, and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after bottling or canning). Refer to section below for use directions and restrictions when making applications in food/feed handling areas of Food/Feed Handling Establishments.

Applications in Food/Feed Handling Areas: Application to food/feed areas of food/feed handling establishments may only be made as a crack and crevice treatment.

Food and feed handling areas include areas for receiving, storage, packing (canning, bottling, wrapping, boxing), preparing edible waste storage, and enclosed processing systems (mills, dairies, edible oils, syrups). Serving areas are also considered a food/feed area when food is exposed and facility is in operation.

- Apply into cracks and crevices using equipment designed to deliver a pin stream between different elements of construction, between floor and equipment, openings to voids and hollow spaces in walls, bases and equipment.
- Do not apply to areas or surfaces where food/feed, food utensils or food processing surfaces may come into contact and become contaminated.
- Do not apply to areas that are routinely washed such as cracks and crevices in tops of tables, food/feed preparation and prepared food holding surfaces.

Re-treatment Directions

Application to specific areas previously untreated can be treated as necessary. Typical or maintenance applications can be made as frequently as necessary up to a maximum of once per month. For heavy infestations of insect pests that require more than one treatment application to gain control, retreatment is allowed 7 days after initial application.

Use Restrictions:

- Do not apply this product to pets, edible crops, or sources of electricity.
- Do not use water base sprays of APERION™ in or on electrical equipment due to possible shock hazard.
- At residential sites, all food processing surfaces and utensils in the treatment area should be covered during treatment or thoroughly washed before reuse.
- Do not apply this product in patient rooms or in any rooms while occupied by the elderly or infirm.
- Do not apply when classrooms are in use.
- Do not apply to institutions (i.e., libraries, recreational facilities, etc) when occupants are present in the immediate area/room being treated.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store product in original container only in a location inaccessible to children and pets. Do not contaminate water, other pesticides, fertilizer, food or feed in storage.

PESTICIDE DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional office for guidance.

CONTAINER HANDLING:

Plastic Containers: Nonrefillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling, if available or puncture and dispose of in a sanitary landfill, or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

Plastic Bags or Fiber Sacks including Flexible Intermediate Bulk Containers (FIBC) or Fiber Drums With Liners: Nonrefillable container. Do not reuse or refill this container. Completely empty plastic bag or fiber sack into manufacturing or application equipment by shaking and tapping sides and bottom to loosen clinging particles. Empty residue into application or manufacturing equipment. Then offer for recycling, if available or dispose of empty plastic bag, fiber sack or fiber drum with liner in a sanitary landfill, or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

[Following Container Handling directions are for Aperion Insecticide in nonrefillable individual small plastic bags/packets]

Small Plastic Bags [Packets]: Nonrefillable container. Do not reuse or refill this container. Completely empty small plastic bag [packet] into application equipment. Then offer for recycling if available, or dispose of empty bag [packet] in the trash, a sanitary landfill or by incineration.

DuPont will not be responsible for losses or damages resulting from use of this product in any manner not specifically stated on this label or other labels or bulletins published by DuPont. User assumes all risks associated with such non-specified use.

The DuPont Oval Logo, DuPont™, and APERION™ are trademarks of E.I. duPont de Nemours and Company.
