Subject: PRIA Label Amendment – Adding a Supplemental Label to revise the maximum application rate and use pattern for Optimum Gly Canola
Product Name: Dupont DPX-B2856 3.0 Herbicide
EPA Registration Number: 352-832
Application Date: April 6, 2015
Decision Number: 503147

Dear Ms. Ashley:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

EPA Reg. No. 352-832
Decision No. 503147

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, please contact Shanta Adeeb by phone at 703-347-0502, or via email at adeeb.shanta@epa.gov.

Sincerely,

A handwritten signature in blue ink, appearing to read "Reuben Baris". The signature is stylized and cursive.

SUPPLEMENTAL LABELING

**DUPONT™ DPX-B2856 3.0
HERBICIDE
FOR USE ON DUPONT™ OPTIMUM®
GLY CANOLA**

DUPONT™ DPX-B2856 3.0 HERBICIDE

EPA REG. NO. 352-832

FOR USE ON DUPONT™ OPTIMUM® GLY CANOLA

This supplemental label expires on January 31, 2018 and must not be used or distributed after this date.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not use this product until you have read the entire label for DuPont™ DPX-B2856 3.0 herbicide.

Apply DuPont™ DPX-B2856 3.0 herbicide to canola containing the OPTIMUM® GLY herbicide tolerance trait. Application of this product to canola that does not contain the OPTIMUM® GLY trait will result in severe crop injury and yield loss.

Refer to the following table for the maximum application rates for this product with OPTIMUM® GLY canola:

Maximum Application Rates	
Total of all Preplant, At-Planting, Preemergence applications	64 fl oz/A
Total of all In-crop applications from emergence through harvest	68 fl oz/A
Total of all In-crop applications from emergence through the 6-leaf stage	68 fl oz/A
Total of all In-crop applications from the 6-leaf stage through first-flower	34 fl oz/A

Preplant, At-Planting, Preemergence

- Apply DPX-B2856 3.0 up to a rate of 64 fl oz/A as a preplant or preemergence broadcast spray made with ground or aerial equipment.

Postemergence (In-crop)

- This product may be applied postemergence (in-crop) to OPTIMUM® GLY canola varieties from emergence through the first-flower stage of development.
- Apply up to 68 fluid ounces of this product per acre no later than the 6-leaf stage of canola development or up to 34 fluid ounces per acre after the 6-leaf stage through first-flower.

Restrictions for Use on OPTIMUM® GLY Canola

- Refer to the Section 3 Federal product label for listings of other labeled crops, weeds controlled, application information, and other important precautions and restrictions.
- No more than two in-crop (over-the-top) broadcast applications may be made from crop emergence through the first-flower stage of canola development and the total in-crop application must not exceed 68 fluid ounces of this product per acre.
- No more than 34 fluid ounces of this product may be applied in-crop after the 6-leaf stage.
- Allow a minimum of 60 days between last application and harvest of canola grain.
- Employ a 30-day plantback interval for all non-labeled crops following applications of DPX-B2856 3.0 to Optimum GLY canola.

IMPORTANT

BEFORE USING DPX-B2856 3.0, READ AND FOLLOW ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS ON THE EPA-REGISTERED LABEL.

This bulletin contains new or supplemental instructions for use of this product which do not appear on the EPA- registered package label. Follow the instructions carefully.

This labeling must be in the possession of the user at the time of pesticide application.

Read the Limitation of Warranty and Liability on the Section 3 Federal product label before buying or using THIS product. If terms are not acceptable, return the unopened package at once to Seller for full refund of purchase price paid. Otherwise, use by Buyer or any other User constitutes acceptance of the terms of the Limitation of Warranty and Liability on the Section 3 Federal product label.
