ARTOX

LIQUID

A.M.A. & 2,4-D

KILLS Lawn Weeds - Dandelion, Crab Grass, Chickweed, Plantain, Dallis Grass

ACTIVE INGREDIENTS

INERT INGREDIENTS

CAUTION: Keep Beyond Reach of Children. SEE NEW LABEL FOR ADDITIONAL CAUTION. For Page No. 4993.

Do not use Super Super ARTOX Liquid when grasses are dead or dormant due to drought or other unfavorable factors. For newly seeded lawns do not apply until after the first mow. Water lawns daily previous to applying and water lawns to normal watering 7 days after treatment. See label for more complete instructions.

WHEN TO APPLY: Early in April and May for the South, early in June and July for the North. Early June for lawn seedlings. Dallis Grass and simultaneous control of weeds. Since germination of many lawn weeds extends over several months, repeat applications at 7-10 day intervals may be necessary for new growth. Delay reseeding bare spots until 2 weeks after last application.

HOW TO APPLY: For use with the following equipment: Pump Pressurized Sprayer or Garden Hose Jar Sprayer. Apply to the top surface of weeds to be controlled. Do not apply to the soil. For application on lawns, apply to the top surface of the lawn. Do not use application on lawns with a White Clover seedling. Apply to the top surface of the lawn. Do not use application on lawns with a White Clover seedling. Apply to the top surface of the lawn. Do not use application on lawns with a White Clover seedling.

Table with 2 columns: Application Rate and Coverage. Includes rows for 1/2 gallon, 1 gallon, and 2 gallons.

APPLICATION BY SPRINKLING CAN: Apply to the top surface of the lawn. Do not use application on lawns with a White Clover seedling.

IMPORTANT: ...

CAUTION:

... Do not use on lawns with a White Clover seedling. ...
