THEIR LAST MEAL

GOPHERS — Burrowing pocket gophers throw out low, fan shaped mounds on either side of their underground tunnel. These lateral openings are on the flat side of the fan and are plugged with soil. With a long handled spoon carefully remove the plug. Introduce two tablespoons of **MOLOGEN** as far into the tunnel as possible. Reclose opening.

MOLES — The presence of moles is indicated either by a network of ridges in the turf or (when burrowing deeply) by a series of conical mounds of earth pushed up from below.

SURFACE RIDGES: To locate active runways crush the ridges at frequent intervals and return next day to find some of the tunnels reconstructed. Carefully punch a hole in the top of the active tunnels drop in two tablespoons of **MOLOGEN** and carefully close the hole. Take care not to again collapse the tunnel or allow loose soil to cover the bait.

DEEP TUNNELS. Remove center plug from the conical mounds with the aid of a long handled spoon and drop two tablespoons of **MOLOGEN** into the underground tunnel. Close opening with rock or sod.

NOTT

MOLOGEN

KILLS MOLES AND GOPHERS

 **DANGER: POISON** Keep out of reach of children. See anti-dote statement and other required warning statements on the side panel. **READY TO USE** Net Weight 8 oz.

+

"PEANUT FORMULA"

Active Ingredient: Strychnine Sulfate	0.35%
Inert Ingredients:	99.65%
Total	100.00%

DANGER: Convulsive Poison! Do not contaminate feed and foodstuffs. Keep away from children and domestic animals. May be fatal if swallowed. Not for use or storage in or around the home. Do not reuse empty container. Destroy it by burying with waste or burning. Stay away from smoke or fumes.

ANTIDOTE: If less than 10 minutes has passed since the poison was taken, give a tablespoon of salt in a glass of warm water. Have victim lie down in a quiet, darkened room and keep him warm. Call a physician immediately.
