READY TO USE

**INSERT CIGARETTE INTO THE CARTRIDGE**

When the ridges are present locate the hole by depressing the ridge at several positions. The cartridge will be reassembled without opening a hole in the top of the cartridge. Light face, long face and first and finally into the hole. Be care not to apply pressure to the top of the cartridge and to smother the cigarette.

When a cigarette of optimal moisture content is used, the cigarette will be held in place by the ridges. Light face, long face and first into the hole. Be care not to apply pressure to the top of the cartridge and to smother the cigarette.

When a cigarette of optimal moisture content is used, the cigarette will be held in place by the ridges. Light face, long face and first into the hole. Be care not to apply pressure to the top of the cartridge and to smother the cigarette.

**GROUP 1 CIGARETTES:** Light face, long face and first and other face being careful not to smother the cartridge with large dirt.

**GROUP 2 CIGARETTES:** Treat late in the evening when all weeds are dry. Device appropriate means to insert lighted cigarette at the end of a long pole. Light face and guide cigarette into hole with face and first. Cover with rock or soil being careful not to smother the lighted cigarette.

**ACTIVE INGREDIENTS:**

Potassium Nitrate	46.7%

NBT

An effective control for burrowing rodents (moles, woodchucks, and ground squirrels). Kills ground wasps.

**WHEN READY TO USE.**

**INSERT ONE FUSE INTO THE CARTRIDGE**

**MOLES:** When surface ridges are present locate active runways by collapsing the ridge at several scattered points. Active runways will be re-constructed next day. Carefully punch a hole in the top of active tunnels. Light fuse, insert fuse end first and carefully close the hole. Take care not to again collapse the tunnel or allow loose soil to smother the cartridge.

When a series of conical mounds is present remove center plug with the aid of a long-handled spoon. Light fuse, insert fuse end first into the underground tunnel. Close opening with rock or sod.

**WOODCHUCKS:** Locate all entrances. Select one for use and close all other entrances with rock and dirt. Light fuse, insert fuse end first. Cover with rock and dirt being careful not to smother the cartridge with dirt. Consult state game laws before using this product for woodchuck control.

**GROUND SQUIRRELS:** Light fuse, insert fuse end first and cover hole being careful not to smother the cartridge with loose dirt.

**GROUND WASPS:** Treat early in the evening when all Wasps are inside. Devise appropriate means to insert lighted cartridge without being stung. As an example, hang cartridge at the end of a long pole, light fuse and guide cartridge into hole with fuse end first. Close with rock or sod being careful not to smother the lighted cartridge.

**ACTIVE INGREDIENTS:**

Potassium Nitrate	40.0%
Sulphur	34.8%
Sawdust	8.7%

**INERT INGREDIENTS**
