

Baygon® is the Reg. TM of the Parent Co. of Farbwerke Bayer GmbH, Leverkusen

**MAGNIL®
ROACH TRAP**

DIRECTIONS: Place 2 or 3 MAGNIL Roach Traps in rooms where roaches are seen, along baseboards, near sinks and pipes. Remove sources of food such as grease spots, crumbs, sugar, etc., that attract roaches. If bait becomes dry in trap, pour a few drops of water in holes to soften bait. Traps may be used in edible product areas only when facility is not operating and food is not exposed. Remove and account for all traps prior to resuming food processing. The use in research animal quarters will not induce changes in liver microsomal enzyme activity in these animals. Renew traps as necessary.

CAUTION: Hazardous if swallowed or absorbed through the skin. Do not get on skin, in eyes, or on clothing. Wash with soap and water after using. Do not contaminate food and foodstuffs. Keep out of reach of children and domestic animals. Atropine is antidotal in case of ingestion.

Manufactured by
