WEED BROOM

A GRASS AND WEED KILLER

NET CONTENTS
GALLONS

ACCEPTED

For railroad and industrial use to control annual and perennial weeds and grasses.

ACTIVE INGREDIENTS:

| | |
|--|-------|
| Disodium methanearsonate anhydrous | 0.80% |
| Lithium salt of bromacil (5-bromo-3-sec-butyl-6-methyluracil)* | 0.48% |
| 2,4-Dichlorophenoxyacetic acid, sodium salt anhydrous** | 0.39% |

INERT INGREDIENTS

98.33%

Total arsenic expressed as elemental all in water soluble form 0.326%.

*Equivalent to 2.19% Hyvar-XL.

"Hyvar-XL" is a trademark of E. I. duPont de Nemours & Company, Inc., Patent Pending.

**Equivalent to 0.36% 2,4-D Acid.

CAUTION: Keep Out of Reach of Children

Avoid contact with skin, eyes, or clothing. In case of contact, flush eyes with plenty of water for at least 15 minutes and get medical attention; wash skin with plenty of soap and water. Do NOT allow solution or spray drift to contact desirable plants. Among crops highly susceptible to 2,4-D injury are cotton, tobacco, blackeyed peas, beans, tomatoes, melons, other vegetables, grapes, fruit trees, and some ornamentals. (Coarse sprays are less likely to drift than fine mist sprays.) It is difficult to completely clean 2,4-D from sprayers or other equipment, therefore do NOT use 2,4-D sprayers and other equipment for purposes where even trace amounts of this chemical may cause injury to desirable plants. Do NOT reuse shipping containers; destroy by crushing and burying. Avoid contamination of water intended for irrigation and domestic use. Do NOT transport with or store near seeds, fertilizers, insecticides, or fungicides. Store at temperatures above 32°F. If allowed to freeze, remix before using.

Do NOT apply to areas underlaid by roots of desirable trees and shrubs.

EXAMPLES OF USES: WEED BROOM may be used wherever non-cropland weed control is desired, and in any areas where vegetation is not wanted (see CAUTION). Examples are as follows:

Railroads—rights-of-way, yards, and trestles.

Utilities—pipelines, telephone, telegraph, and electricity power line poles, and power sub-stations.

Highways—bridges, signposts, roadside markers, road shoulders, and general highway maintenance.

Industrial Sites—petroleum and other tank farm areas, pipelines, lumberyards and mills, boundary fences, warehouses, industrial driveways, and industrial parking areas.

Agricultural—granaries and elevators, farm buildings, drainage ditches, and farm roads.

Others—airfields, runways and landing lights, and outdoor theatres.

APPLICATION

HOW TO APPLY: It is essential that WEED BROOM be sprayed uniformly at rates given. Use water as a carrier. Apply in sufficient quantity to give uniform coverage.

AMOUNTS TO USE: Annuals or Shallow-Rooted Perennials—Apply 1½ to 2 pints of WEED BROOM per 100 square feet; use the same rate as a follow-up application if required due to reinfestation.

Deep Rooted Herbaceous Perennials—Apply 2 to 3 pints of WEED BROOM per 100 square feet. If an additional application is desired, use 2 to 3 pints per 100 square feet.

WHEN TO APPLY: For annual weeds and grasses. It is best to apply in the spring or when weeds are small.

For perennial weeds and grasses—In areas of light rainfall (less than 20 inches of rainfall) it is generally better to apply in fall and winter months. In areas with heavy winter rains, spring application usually gives the best results.

Local conditions may affect the use of this chemical. Consult State Agricultural Extension or Experiment Station weed specialists for specific recommendations for local weed problems.

Follow directions carefully. Timing and method of application, weather and crop conditions, mixtures with other chemicals not specifically recommended, and other influencing factors in the use of this product are beyond the control of the seller. Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.

Do NOT Store with Foodstuffs

Avoid Storing in Direct Contact with Ground or Concrete Floors

Store in a Cool, Dry Place

WEED BROOM

A GRASS AND WEED KILLER

NET CONTENTS
GALLONS

For railroad and industrial use to control annual and perennial weeds and grasses.

ACTIVE INGREDIENTS

| | |
|--|-------|
| Dipotassium methanearsenate anhydrous | 0.80% |
| Lithium salt of bromoacetyl 3,5-dimethyl-6-mercapto-2-pyridone | 0.40% |
| 2,4-Dichlorophenoxyacetic acid, sodium salt anhydrous** | 0.30% |

INERT INGREDIENTS

| | |
|--|-------|
| Total arsenic, expressed as elemental, in water soluble form @ 22.6% | 0.36% |
|--|-------|

*Equivalent to 2.19% Hyvar X.
Hyvar X is a trademark of E. I. duPont de Nemours & Company, Inc. Patent Pending.
**Equivalent to 0.36% 2,4-D-A-1.

CAUTION: Keep Out of Reach of Children

Avoid contact with skin, eyes, or clothing. In case of contact, flush eyes with plenty of water for at least 15 minutes and get medical attention; wash skin with plenty of soap and water. Do NOT allow solution or spray drift to contact desirable plants. Among crops highly susceptible to 2,4-D injury are cotton, tobacco, blackeye peas, beans, tomatoes, melons, other vegetables, grapes, fruit trees, and some ornamentals. (Coarse sprays are less likely to drift than fine mist sprays. It is difficult to thoroughly clean 2,4-D from sprayers or other equipment; therefore do NOT use 2,4-D sprayer and other equipment for purposes where even trace amounts of this chemical may cause injury to desirable plants. Do NOT reuse storage containers; destroy by crushing and burying. Avoid contamination of water intended for irrigation and domestic use. Do NOT transport with or store near seeds, fertilizers, insecticides, or fungicides. Store at temperatures above 32° F. It is allowed to freeze, re-mix before using.

Do NOT apply to areas underlaid by roots of desirable trees and shrubs.

EXAMPLES OF USES: WEED BROOM may be used wherever non-cropland weed control is desired, and in any areas where vegetation is not wanted; see CAUTION. Examples are as follows:

Railroads: rights of way, yards, and trestles

Utilities: pipelines, telephone, telegraph, and electricity power line poles and power sub stations

Highways: bridges, signposts, roadside markers, road shoulders, and general highway maintenance

Industrial Sites: petroleum and other tank farm areas, pipelines, lumberyards and mills, bin areas for grain, warehouses and grain elevators, and industrial parking areas

Agricultural: granaries and elevators, farm buildings, drainage ditches, and farm roads

Other: tennis courts, runways and landing lights, and outdoor theatres

APPLICATION

HOW TO APPLY: It is essential that WEED BROOM be applied at the rates given. Use water as directed. Apply in sufficient quantity to give uniform coverage.

AMOUNTS TO USE - Annual or Shallow-Rooted Perennials: Apply 1 to 2 pints of WEED BROOM per 100 square feet, at the same rate as a follow-up application if required for complete infestation.

Deep Rooted Herbaceous Perennials: Apply 1 to 3 pints of WEED BROOM per 100 square feet. If a follow-up application is required, use 2 to 3 pints per 100 square feet.

WHEN TO APPLY - for annual weeds and grasses: It is best to apply in the spring or when weeds are small.

For perennial weeds and grasses: In areas of light rainfall, less than 20 inches of rainfall, it is generally better to apply in fall and winter months. In areas with heavy winter rainfall, spring application usually gives the best results.

Local conditions may affect the use of this chemical. Consult State Agricultural Extension or Experiment Station weed specialists for specific recommendations for local weed problems.

Follow directions carefully. Timing and method of application, weather and crop conditions, mixtures with other chemicals not specifically recommended, and other influencing factors in the use of this product are beyond the control of the seller. Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.
