Bactospeine is the registered trademark of Pasteur Institute.

Bactospeine WP is suitable for use in all power operated ground sprayers and by aircraft. Mix recommended amount in a minimum of 5 to 20 gallons of water per acre when applied by aircraft or 20 to 100 gallons of water when applied by ground equipment. Keep spray mix agitated while spraying. Good leaf coverage is essential to achieve effective insect control. Use the higher recommended rate for heavy insect infestations. Apply Bactospeine WP when larvae are first observed. Repeat applications may be needed at weekly intervals to maintain control.

Bactospeine WP is exempt from tolerance requirements on registered crops and may be applied in recommended amounts up to the day of harvest.
