For best results and for a more convenient spraying machine, the material should be replaced by a new cartridge when the old one has been used.
 When cartridges are replaced the old cartridge may be saved and used in a separate container. They may be used in a separate container if they are properly filled.
 The material should be used when the old cartridge is used. It is recommended that the cartridge be used when the old cartridge is used. It will be used when the old cartridge is used.
 The material should be used when the old cartridge is used. It is recommended that the cartridge be used when the old cartridge is used. It will be used when the old cartridge is used.
