

GENERAL INFORMATION

Residex Chlordane 20 Refined Oil Concentrate is an oil soluble concentrate containing 20% by weight refined grade of chlordane. It is recommended for household and industrial use in the control of Roaches, Ants, Silverfish, Firebrats, Spiders, Centipedes, and Brown Dog Ticks.

DIRECTIONS FOR USE AS SPOT TREATMENT IN NON-FOOD AREAS

ROACHES - Thoroughly treat infested cracks, baseboards in dark corners and other hiding places. Apply locally on exposed surfaces, where Roaches crawl when they come out of hiding.

ANTS - Thoroughly treat foundation walls or pillars 6-8 inches up from the ground, ant tracks and areas around door-sills, and window frames, where the pests may enter the premises. It is frequently desirable to treat openings around water pipes, heat ducts, electrical outlets, and baseboards where ants may come out into rooms from wall spaces and partitions.

SILVERFISH AND FIREBRATS - Treat baseboards, areas behind shelving, book-cases, and storage areas, and any other infested cracks or hiding places.

SPIDERS AND CENTIPEDES - Apply as a spray along infested baseboards and corners. In basements, treat pipes, storage localities, and other areas infested. Apply a liberal application for Spider control in garages, sheds, to porches, under eaves and crawl spaces.

BROWN DOG TICKS - Thoroughly treat infested cracks, and other hiding or resting places, such as around baseboards, window and door frames, wall cracks, sleeping quarters of household pets, and local areas on floors. Fresh bedding should be placed in animal quarters following treatment. **DO NOT USE ON DOG**
