

DIRECTIONS FOR USE

Use 2 lbs. per 1,000 square feet of lawn for the control of:

millipedes	earwigs	fleas
ants	fall armyworm	mosquitoes
chinch bugs	leafhoppers	sod webworms (lawn moths)

For best results, mow lawn and apply immediately after rain or watering. Repeat 2 to 3 weeks later if necessary.

ORNAMENTAL INSECTS

Residex Sevin 10-D at recommended concentrations can be safely used on a wide range of ornamental plants, flowers, shrubs, and shade trees including rose, carnation, gladiolus, zinnia, chrysanthemum, lilac, arbor vitae, juniper, hydrangea, azalea, elm, maple, oak, dogwood, birch, and pinus. Do not use on Boston Ivy.

Use at the rate of 15 to 20 lbs. per acre or (use sufficient dust to obtain full coverage. Apply dust thoroughly to upper and lower leaf surfaces). Make first application when insects are first noted and repeat at 7 to 10 day intervals as necessary to control:

apple aphid	Japanese beetle	plant bugs
bagworm	June beetles	puss caterpillars
birch leaf miner	lace bugs	psyllids
blister beetles	leafhoppers	rose aphid
boxelder bug	leaf rollers	rose-slug
boxwood leaf miner	mealy bugs	scale insects
elm leaf aphid	mimosa webworm	tent caterpillars
elm leaf beetle	oak leaf miners	thorn bugs
flea beetles	orange tortrix	thrips (exposed)
gypsy moth	periodical cicada	willow leaf beetles

CAUTION

Harmful if swallowed or inhaled. Do not take internally. Avoid breathing dust or spray mist. Avoid prolonged or repeated contact with skin. Wash thoroughly after handling. Change contaminated clothing daily. Avoid contamination of feed and foodstuffs.

NOTE

Residex Sevin 10-D does not control spider mites. Where infestations are encountered, use a recommended miticide.

For protection of honeybees, avoid unnecessary use during periods when honeybees are visiting the crop. When necessary to use during such periods, warn beekeepers well in advance to locate hives at safe distances until one week after application.

Injury to tender foliage may occur if applications are made when plants are wet or in the presence of high humidity of several days' duration following treatment.
