UNEPOXY COLORS

Unepoxy is an effective hard facing antifouling paint. Often used on PETTIT'S VINYL COATED FIBERGLASS, it is most effective on hard aged hard facing finishes. It is recommended that old antifouling or semi hard antifouling paints should be removed for best results between coats. After the first coat is applied, the boat may be used in 2 months maximum.

FIBERGLASS: Wash fiberglass with PETTIT'S #1222 BRUSH OFF and dirt. Sand thoroughly with medium grit sandpaper. Wash with Unepoxy. An alternate system for fiberglass hulls with PETTIT'S #1222 BRUSH OFF is a coat of 9399 SA' DLESS PREP COAT. After the prep coat is applied, the first coat of Unepoxy is applied to the hull.

WOODEN HULLS: Old antifouling paint should be removed. A non-antifouling hard facing finish should be applied. Apply 1 coat of PETTIT'S RED LEAD PRIMER and 1 coat of Unepoxy.

STEEL HULLS: To remove old rust, scale and dirt from the hull, wash the surface with PETTIT'S #1222 BRUSH OFF. Apply 1 coat of PETTIT'S VINYL METAL PRIMER to the hull and 1 coat of RED UNDERCOATER and let dry 2 hours before applying Unepoxy.

CLEANING AND THINNING: Use PETTIT'S #1222 BRUSH OFF.

DO NOT USE THIS PRODUCT ON ALUMINUM HULLS. PAINTS CONTAINING COPPER

CAUTION

HARMFUL OR FATAL IF SWALLOWED. MAY CAUSE SKIN IRRITATION

CONTAINS COPPER AND TIN COMPOUNDS AND AROMATIC AMINOACETIC ACID. Drink milk. Do not breathe spray mist. Do not get in eyes, on skin or in mouth. Wash skin. In case of skin contact, remove contaminated clothing and wash with soap and water. Flush eyes with water. Get medical attention if irritation persists. Avoid food or food products. Do not apply to any surface that will be used for food. Destroy it by perforation or crushing. Bury or discard in safe place.

Use with adequate ventilation.
