BORERKIL[®]

This product, BORERK!L which you are about to use, is a paste and contains LINDANE. When used as directed, t effectively controls borers in trees, shrubs, and flowers. The tube comes with an applicator for easy application.

Clean applicator after use.

BORERKIL i effective against the younger and active stages of many of those borers which clean their burrows by pushing the borings or frass through the holes on the surface of the plant. Examples of these are the Leopard Moth, the Oak Romeleum over and Maple Beetle borer.

BORERKIL should be used only when the larvae are active as is evidenced by fresh borings being pushed to the surface. BORERKIL will not spoil or lose its strength if the container is kept tightly closed when not in use.

DIRECTIONS

BORERKIL FOR BORERS IN TREES

cap from tube and screw on the applicator, insert the replacator into the burrow of the horing insect and squeeze a substantic! quantity of the material into the burrow. One is a sufficient for small borrows, others may need two or the capper to purpose their size. Close the openings of the private with well so liatter treating with BORERKIL unless their elections with well so liatter treatment, the forms from BORERKIL axproximate the borers. After treatment, relevant to trees and a unit originally to detect any borer damage missed in previous treating its. If the library remain active after treatment, due to faulty application or too small a dose, repeat the treatment after toward areas.
