DIRECTIONS

Remove Dust Cap from sprayer by turning clockwise. Release sprayer by turning V shaped head counter clockwise.

Hold sprayer 6 to 8 inches from surface to be cleaned and spray with short stroked. Dirt, grease, smudges, and ground-in dirt are loosened at once. Wipe off loosened dirt with a damp sponge, cloth, or a dry paper towel.

To clean large areas, such as shower stalls, tile around bathtubs, woodwork, etc., spray from the bottom to the top to insure complete coverage.

Lethelin Hard Surface Cleaner will also clean and sanitize bathtubs, wash basins, kitchen exhaust fans, hoods over stoves, and refrigerators. Also, excellent for cleaning white wall tires, plastic upholstery outdoor furniture, and most washable surfaces.
