DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING. Surfaces and objects must be cleaned of gross filth before treatment. Spray surfaces and articles until thoroughly dampened and allow to remain wet for at least 10 minutes.

- AS AN INSECTICIDE, BACTERICIDE, MOLD AND MILDEWCIDE, DEODORANT AND FUNGICIDE spray surfaces and articles until thoroughly dampened and allow to remain wet for at least 10 minutes.
- TO KILL ROACHES, BEDBUGS, ANTS AND SILVERFISH: The infested areas should be sprayed thoroughly and repeatedly, directing the spray into all crevices, cracks, hiding places, seams, creases and folds.
- TO KILL LICE AND LOUSE EGGS: The infested areas should be sprayed thoroughly and repeatedly directing the spray into all crevices, cracks, hiding places, seams, creases and folds.
- TO DEODORIZE AND CONTROL ODOR-CAUSING ORGANISMS ON CARPETS, apply STERI-FAB thoroughly to top and undersides of rugs and carpets and mats to kill odor-causing bacteria and fungi and allow to remain wet for at least 10 minutes.
- TO KILL FLEAS AND TICKS: The infested area should be sprayed thoroughly and repeatedly directing the spray into all animal quarters and surrounding areas. For best results remove and destroy old animal bedding prior to use. Do not spray animals. Animals should be treated with an appropriate flea and tick spray designed for their use before they reenter the treated area.
- TO KILL SOYBUGS, CENTIPEDES, FIREBRATS AND MITES: The infested area should be sprayed thoroughly and repeatedly directing the spray into all crevices, cracks and other hiding places.
- TO SANITIZE AND DEODORIZE RESTROOMS: Apply STERI-FAB on all surfaces (avoiding contact with food and animals) until a moist surface is obtained and allow to remain wet for at least 10 minutes.
- TO PROVIDE FOR BACTERIOSTATIC, FUNGISTATIC AND DEODORIZATION DURING RESTORATION PROCESSES: Apply STERI-FAB to all surfaces until a moist surface is obtained and allow to remain wet for at least 10 minutes.
- TO SANITIZE ON PRE-CLEANED, NON-POROUS, NON-FOOD CONTACT SURFACES: Apply STERI-FAB to all surfaces until a dewlike mist is obtained and allow to remain wet for at least 10 minutes.

The suggested quantities of STERI-FAB when used as directed, furnishes good coverage on these surfaces providing for sanitizing, bacteriostatic, and fungistatic values.

Using a hand or power sprayer, keeping approximately one foot from surface to be sprayed, apply STERI-FAB over all surfaces until thoroughly dampened coverage is obtained. Be sure that all folds, creases, seams, etc., are also covered in this manner. Allow treated items to remain wet for at least 10 minutes and then dry before using.

FOR BACTERIOSTATIC, FUNGISTATIC AND DEODORIZATION

- MATTRESSES (SURFACES): Spray coverage varies from 4-8 ounces depending on size. Single bed and folding cot mattresses use 4-5 ounces of STERI-FAB. Double bed mattresses use 6-8 ounces of STERI-FAB.
- SOFAS—UPHOLSTERED CHAIRS (SURFACES): Small sizes such as love seats use 4-5 ounces of STERI-FAB. Regular size sofas use 6-8 ounces. Use 8 ounces of STERI-FAB on convertible sofas.

FOR DISINFECTION OF NON-POROUS SURFACES

- FOR THE DISINFECTION OF NON-UPHOLSTERED CHAIRS, BED SPRINGS, AND FURNITURE (THOSE WITH NON-POROUS SURFACES), STERI-FAB should be applied to all surfaces until a dew-like appearance is obtained and allow to remain wet for at least 10 minutes.
- TO KILL HERPES SIMPLEX TYPE 2 on non-porous surfaces, apply STERI-FAB until thoroughly dampened coverage is obtained and allow to remain wet for at least 10 minutes.
- TO KILL ATHLETIC'S FOOT FUNGUS, apply STERI-FAB to all suspected or contaminated non-porous hard surfaces until thoroughly dampened and allow to remain wet for at least 10 minutes.
